CHAPTER-V

---------------------
BIBLIOGRAPHY

---------------------
Aggarwal, V.P. (1986) : Statistical methods concepts, Applica
and computation sterling publishers private
Ltd., New Delhi.

Agrawal, M. (1989) : Studies on oxygen consumption of the rat
adrenal and its correlation with cholesterol
total lipids and electrolyte concentration
under the influence of amino acids. Ph.D. Thesis Sagar University, Sagar.

Alsena, G.J., Degenhart, H.J.;
and Hoogerbrugge, J.J. (1982) formation of 22-keto cholesterol from 22-
S-hydroxy cholesterol by a NADPH and oxygen
dependent, carbon mono-oxide insensitive
enzyme in bovine adrenal cortex mitochondria
J. Steroid Biochem. 17(1) 37-40.

Phys. 56: 51-98.

Bhartendu and Menon,
(1978). : Effect of atmospheric small negative ions on
oxygen consumption of mouse liver cells.

Bloch, K. and Rittenberg,
D., (1942) : The biological formation of cholesterol from
acetic acid. J. Biol. Chem. 143(1): 297-298

Bonner, J., (1952) : Morphogenesis. Princeton University Press,
Princeton N.J.

Bonner, J. and Vomer,
New York.

Borek, B.A. and
Weelsch, H., (1953) : An intermediate of the enzymic degradation

Meister, A., (1957)

Mill, J., (1972)

Respiration in Invertebrates St. Martin's Press, London.

The effect of SH- groups of cysteine on the rate of oxygen uptake by some homogenates of Rabbit tissues. Acta Physiol. Pol. 28 (6) : 541-552.

Moeze, J.R. Fischer, G. and Porta, J., (1971)

Nakada, H.I., Friendmann, B. and Weinhouse, S. (1955)

J. Biol. Chem. 216 : 583.

Soper, R. (1995) : Biological Science, Published by Press syndicate of the University of Cambridge. The Pitt. Trumpington Street Cambridge. CB2 1RP.

Steen, J.B. (1971)

Tobin, Rechard R., (1972)

Effect of pH on oxidative phosphorylation of rat liver mitochondria. Amer. J. Physiol. 223 (1) : 83-88.

Metabolism of p-hydroxy phenylpyruvic acid. J. Biochem. (Japan) 41 : 41-45.

Effect of glutamic acid and some other amino acids on the biogenesis of glucocorticoids in the adrenal glands. Problendo-krinol - 16(2) : 84-88.

Increase in activity of X-amino levulinic acid synthetase in liver mitochondria induced by feeding of 3-5 dicarbethoxy 1.4 dihydrocollidine. 58. J. Biol.Chem. 238 : 811.

The action of strong doses of tyrosine on oxygen consumption in the rat. Agressologic 11(1) : 67-70.
