LIST OF FIGURES

Fig 1.1 - Hydrological Cycle; Drever (1982).
Fig 1.2 - Location Map of Loktak Catchment Area.
Fig 1.3 - Associate Lake (Basin) of Loktak lake, study area.
Fig 1.4 - Settlements, in and around Loktak lake, Manipur.
Fig 1.5 - Drainage map of Loktak Catchment area, Manipur (After Loktak Development Authority, Manipur).
Fig 1.6 - Feeder Streams and Outlets of Loktak lake.
Fig 1.7 - Average Temperature (°C) of Imphal District, Manipur (1990-1997).
Fig 1.8 - Average yearly Rainfall, Imphal District, Manipur (1990-1997).
Fig 3.1 - Geological Map of Manipur.
Fig 3.2 - Geological map of Ithai Barrage site.
Fig 3.3 - Geomorphological map of Imphal Valley & its surroundings.
Fig 4.1 - (a) Scatter diagram of (Ca + Mg) Vs HCO₃ of Loktak lake.
Fig 4.1 - (b) Scatter diagram of (Ca + Mg) Vs Total Cations (Tz⁺) of Loktak lake.
Fig 4.2 - Variation of Na/Na+Ca as a function of total dissolved solids (all other data from Gibbs, 1970).
Fig 4.3 - Cations - Anions diagram of water samples of Loktak lake, Manipur.
    (Diagram represents the total of all 37 water samples of Loktak lake.)
Fig 4.4 - Cations - Anions diagram of water samples of Loktak lake, Manipur.
    (Diagram represents the mean of 37 water samples of Loktak lake.)
Fig 4.5 - Hydrochemical facies of Loktak lake, Manipur.
Fig 4.6 - Inter-ionic relationship between (a) Ca-HCO₃ and (b) Mg - HCO₃ in the
        Loktak lake water.
Fig 4.7 - Variation of Na/Na+Ca as a function of total dissolved solids (all other data
        from Gibbs, 1970).
Fig 4.8 - Inter-ionic relationship between (a) Ca - HCO₃ and (b) Mg - HCO₃ in the
        Loktak lake water.
Fig 4.9 - Inter-ionic relationship between (a) Ca - Na and (b) Mg - Ca in the Loktak lake water.

Fig 4.10 - Inter-ionic relationship between (a) Ca - SO$_4$ and (b) K - Na in the Loktak lake water.

Fig 4.11 - Inter-ionic relationship between (a) PO$_4$ - TDS and (b) Na - TDS in the Loktak lake water.

Fig 4.12 - Inter-ionic relationship between (a) Mg - TDS and (b) SO$_4$ - TDS in the Loktak lake water.

Fig 4.13 - Inter-ionic relationship between (a) Hardness-TDS and (b) Ca-TDS in the Loktak lake water.

Fig 4.14 - Inter-ionic relationship between (a) HCO$_3$ - TDS and (b) Cl - TDS in the Loktak lake water.

Fig 4.15 - Inter-ionic relationship between (a) K - TDS and (b) F, Br, I - TDS in the Loktak lake water.

Fig 6.1 to Fig. 10 - Cumulative frequency curve of bed sediment sample of Loktak lake, Manipur. (For ten different samples).

Fig 6.11 - Frequency percentage curve of sediment samples of Loktak lake, Manipur. (for sample No. 1 to 5).

Fig 6.12 - Frequency percentage curve of sediment sample of Loktak lake, Manipur (for sample No. 6 to 10).

Fig 6.13 - Sorting ($\sigma_\phi$) and Skewness (Ski) Vs Mean size (Mz).

Fig 6.14 - Kurtosis ($K_0$) Vs Mean Size (Mz).

Fig 7.1 - Representation of (a) Calcite and (b) Aragonite saturation level as a function of Salinity in Loktak lake water.

Fig 7.2 - Representation of (a) Dolomite and (b) Gypsum saturation level as a function of Salinity in Loktak lake water.

Fig 7.3 - Representation of (a) Anhydrite saturation level as a function of Salinity in Loktak lake water.

Fig 7.4(a) - Simplified carbonate - water system.
Fig 7.4 (b) - Proportions of the carbonate species in solution at Different pH values  
( After Hutchinson, 1957 ).

Fig 8.1 - Map showing dredging area of Loktak lake.
Fig 8.2 - Loktak lake showing peripheral lands submerged due to Hydel Project.
Fig 8.3 - Impact of Ithai Barrage and Sugnu Hump on water regime in Loktak lake.
Fig 8.4 - Geological map of Sugnu area showing site for Chakpi river diversion.
Fig 8.5 - Geoenvironmental map of Imphal Valley, Manipur.
