Acknowledgement

The success of any project depends largely on the encouragement and guidance of many others. I take this opportunity to express my gratitude to the people who have been instrumental in the successful completion of this project.

I would like to begin by thanking Dr. Sanjay Dahal, Professor, Department of Chemistry, Sikkim Manipal Institute of Technology (SMIT) for being the best mentor anyone could ever ask for. There are no words that can express the depth of gratitude that I have towards him for making me love photo-chemistry and changing my thought process for being lifelong researcher with lots of insight into porphyrin chemistry. He has supported me whole heartedly in everything that I set out to do and helped me nurture and develop the research skills that I have right now, believing in me at the moments of my life when I was down and helping me get back on my feet with guidance and timely suggestions.

I wish to express my deep sense of gratitude to members of the Research Protocol Evaluation Committee and the Departmental Research Committee (DRC) for constantly motivating and encouraging me to carry out the project work.

I feel blessed and very privileged to have joined a group of research scholars namely Anup, Sangey and Antara who supported me throughout this course at Sikkim Manipal University and Sikkim Manipal Institute of Technology for allowing me as well as providing me the infrastructure to pursue this study with their continual support.
I would like to thank all my faculty, staff and students at the SMIT Campus for welcoming me into their family. I would like to thank all the staffs and students of Sikkim Manipal Institute of Technology, Sikkim in general and of the department of Chemistry in particular, for their help and good wishes for the successful completion of this project who have made my life here to be enjoyable and worth living, you all know who you are.

Not forgetting my family as well as relations from home and away whom I used to call day after day when I needed support and encouragement.

Dr. Ranabir Pal
