CONTENTS

CHAPTER I - INTRODUCTION

1.1 Introduction ........................................ 1
1.2 Luminescence and related terms ..................... 2
1.3 Electroluminescence and its classification .......... 3
1.3.1 Pure or 'intrinsic' electroluminescence ........... 4
1.3.2 Carrier injection electroluminescence .......... 4
1.4 Mechanism of electroluminescence ................. 5
1.4.1 Carrier injection mechanism ..................... 5
1.4.2 Acceleration-collision mechanism ............... 7
1.4.3 Other mechanisms .................................. 10
1.5 Model representation of EL mechanism ............... 13
1.5.1 Bipolar field-injection model ................... 14
1.5.2 Inverted Maeda model ............................ 15
1.5.3 Recent discussion about models .................. 17
1.6 Statement of the problem ............................ 18
1.6.1 Voltage dependence ............................ 20
1.6.2 Frequency dependence ........................... 20
1.6.3 Temperature dependence .......................... 21
1.6.4 Waveform of EL .................................. 22
1.6.5 Spectral distribution of EL ....................... 22

References ............................................. 23
# Chapter II - Preparation of Phosphors and Electroluminescent Cell

## 2.1 Introduction

## 2.2 Phosphor composition

### 2.2.1 Host material

### 2.2.2 Activators

### 2.2.3 Fluxes

## 2.3 Preparation of phosphors

### 2.3.1 Present method of preparation

- (a) Preparation of charge
- (b) Firing process
- (c) Appearance of phosphors

<table>

<tr>
<th>Table 2.1</th>
<th>Table 2.2</th>
</tr>
</thead>
</table>

## 2.4 The Electroluminescent Cell

### 2.4.1 General considerations

- (a) Dry powders
- (b) Thin phosphor layer
- (c) Effect of dielectrics
- (d) Other factors

## 2.4.2 Description of EL cell used in the present investigation

- (a) Electrode Assembly
- (b) Constants of the cell
- (c) Preparation of phosphor layers
- (d) Advantages of the cell

## References
CHAPTER III - VOLTAGE DEPENDENCE OF ELECTROLUMINESCENCE

3.1 Introduction 44
3.2 Background theory 45
3.2.1 Formulas for voltage dependence 45
3.2.2 Evaluation of trap depth from the study of voltage dependence 47
3.3 Experimental procedure 56
   (a) Excitation source 57
   (b) Detection unit 57
   (c) Measurements 58
3.4 Results and their analysis 59
3.4.1 Brightness-voltage relationship 60
3.4.2 Variation of the term 'A' with frequency 60
3.4.3 Variation of the term 'b' with frequency 63
   Table 3.1 64
   Table 3.2 65
   Appendix 3.1 66
References 68

CHAPTER IV - FREQUENCY DEPENDENCE OF ELECTROLUMINESCENCE

4.1 Introduction 70
4.2 Background theory 71
4.3 Experimental procedure 74
4.3.1 Measurement of brightness variation with frequency 74
4.3.2 Measurement of dielectric variation with frequency

(a) Dielectric constant measuring bridge 75
(b) Circuit arrangement and operating procedure 76

4.4 Results 77

4.4.1 Frequency dependence of EL 77

(a) CaO : Cu 77
(b) CaO : Mn 78

4.4.2 Brightness-frequency relationship 79

4.4.3 Frequency dependence of dielectric constant 81

References 83

CHAPTER V — TEMPERATURE DEPENDENCE OF ELECTROLUMINESCENCE

5.1 Introduction 84

5.2 Background theory 85

5.2.1 General review 85

5.2.2 Theoretical background of the formula employed in the present investigation 88

5.3 Experimental procedure 92

5.3.1 EL Cell 92

5.3.2 Measurements 94

5.4 Results 95

5.4.1 CaO : Cu 95

Table 5.1 97
CHAPTER VI - STUDY OF THE WAVEFORM AND SPECTRAL DISTRIBUTION OF EL EMISSION

6.1 Introduction
6.2 Study of brightness waves
6.2.1 Background theory
6.2.2 Experimental Procedure
6.2.3 Results
   (a) Brightness waves of CaO : Cu
   (b) Brightness waves of CaO : Mn
6.3 Study of spectral distribution
6.3.1 Background theory
6.3.2 Experimental Procedure
6.3.3 Results
   (a) Spectra of CaO : Cu
   (b) Spectra of CaO : Mn
