ACKNOWLEDGEMENT

After completing the thesis there remains now the pleasant and important work of acknowledging the obligations of friends and well wishers without whose help I could not have accomplished the task.

At the outset, I must acknowledge the deep debt of gratitude I owe to my learned supervisor, Dr. (Mrs.) U. Tandon, Assistant Professor, Govt. College of Science, Raipur for guiding me through the thesis.

Further, I cannot but express my sense of indebtedness to our present principal of Science College, Dr. P.R. Khandekar and his predecessor Principal R.N. Tandon; the present head of the Chemistry Department Dr. S.V. Dhamadhikari, and former heads of the same department Prof. S.V. Kelkar and Dr. S.N. Ayeye for affording all the facilities of space and experimentation.

Likewise, I am particularly obliged to Dr. S.G. Tandon, Prof. and Head of the Chemistry Department, Ravishankar University, Raipur for his valuable suggestions, besides providing me I.R. and U.V. facilities.

Last but not the least, to Dr. C. Subha Rao of the Chemistry Department Govt. College of Engineering and Technology, Raipur also I am highly obliged for discussions and
suggestions occasionally as also to my numerous friends
and colleagues in the profession for their proffered help
in the work.

Finally, I cannot omit mentioning with respectful
ful gratitude the authorities of the Ravishankar University
Raipur and the University Grants Commission, New Delhi, for
their ungrudging financial assistance.

3 September, 1980. (S. N. Konher)
