Index

Y-space, 40
equivalence relation, 12
eventually fixed, 3
eventually periodic, 4

$n$-cycle, 4

Fix(f), 68

$n$-od, 42

fixed points, 3

attracting periodic point, 92

Green ordering, 40

Baker’s Theorem, 35

increasingly conjugate, 11

basin of attraction, 3, 92

invariant set, 3

boundary of a set, 62

locally constant, 64

chaotic, 7

Logistic function, 2

conjugate, 11

non-ordinary, 58

critical point, 19, 59

nonwandering, 93

decreasing square root, 77

odd function, 77
discrete dynamical system, 2

orbit, 3
dual of a word, 72

order conjugate, 11
dynamical properties, 12

ordinary point, 58

Dynamical properties of a point, 12

Period sets for Tree maps, 43

Dynamical properties of dynamical sys-
tems, 13

PER(X), 4

Dynamical properties of subsets, 13

period set, 4
dynamical system, 1

Period sets for Tree maps, 43
INDEX

periodic points, 33
precritical points, 92
preperiodic points, 92

recurrent point, 92
rigid, 58
Rotation, 2

scrambled sets, 10
self conjugate word, 72
self-conjugacy, 12
sensitive constant, 7
sensitive to the initial conditions, 7
Sharkovskii’s ordering, 34
Sharkovskii’s Theorem, 34
simple systems, 70
somewhere constant, 83
special points, 58
topological conjugacy, 11
topologically conjugate, 11
totally transitive, 7
trajectory, 3
transitive, 7
Translation, 2
tree, 43
tree space, 43
