ACKNOWLEDGMENTS

I wish to express my profound gratitude Professor U.C. Singh, Head, School of Studies in Earth Science, Jiwaji University, Gwalior for his valuable guidance. I am overwhelmed by his constant encouragement, extra care and affection through out the research tenure. I am quite fortunate to have been associated with him. His farsightedness, undaunted strong will, and his positive and simplistic approach to solve any difficult problem, however grave it may be, will always continue to inspire me.

The research work present in this thesis is an outcome of many discussions I had with Dr. Ninad Bodhankar, Lecturer, School of Studies in Geology & WRM. He has initiated me into this area and has taken pains to put me in right direction. As it so often happens, there are many moments of despondency in this long process, he gave me courage in such moments. I am deeply grateful to him for his faith in me and the time he spent on many occasions for discussion at various levels. The present work is inconceivable without the contribution of these discussions and his useful comments.

I am grateful to Dr. M.W.Y. Khan, Reader & Head, Dr. D.P. Kuity, and Dr. S.K. Pandey of School of Studies in Geology & WRM, Pt. Ravishankar Shukla University, Raipur for their constructive criticism and cooperation in several ways. I am also thankful to the technical and official staff of the School of Studies in Geology & WRM for their kind cooperation.

I am also indebted to Dr. Manas Kanti Deb, Lecturer, School of Studies in Chemistry, Pt. Ravishankar Shukla University, Raipur for his useful suggestions and constant encouragement.

Cordial thanks and due acknowledgments are extended to the Environment Management Department, Bhilai Steel Plant, Bhilai; Soil Science Department, IGKV, Raipur; Director, Remote Sensing Application Centre, MAPCOST, Bhopal; and Hydrology & Tracers Section, Isotope Division, BARC, Mumbai, for the permission to use their research laboratories.
I gratefully acknowledge the sense of understanding and timely support from my hostel
inmates especially Pradeep Sao, Keshav Kant Sahu, Bibhu Bhushan Pradhan and Dilip
Kumar Singh. I am also grateful to Shri B.K. Taneja, Dr. (Mrs.) Sharmistha Dutta, Shri Rohit
Saxena for their unstinting help at various stages.

I acknowledge special thanks to Pt. Ravishankar Shukla University, Raipur for the award
of research fellowship.

I am unable to find appropriate words to express my reverence for my parents whose
blessings and inspirations were greatly instrumental in accomplishing this work.

(Shivadeo Upadhyaya)
