	List of abbreviations	iv
	List of tables	v
	List of figures	viii
Chapter 1	Introduction	1 – 23
	1.0 Background of the study	1
	1.1 Major concepts	2
	1.2 Environment-economy interaction	7
	1.3 Economic growth, urbanisation and environmental degradation	8
	1.4 Statement of the problem	10
	1.5 Hypotheses	15
	1.6 Objectives	16
	1.7 Data and methodology	16
	1.8 Limitations	16
	1.9 Structure of the study	17
	References	18
Chapter 2	Review of literature	24 – 48
Chapter 3	Approach to the study	49 – 67
	3.1 Methodological approaches to environmental valuation	49
	3.2 Economic values of environmental assets	49
	3.3 Non-market valuation	51

3.4	Overview of methods for environmental valuation	52
3.5	Hedonic Pricing Method (HPM)	54
3.6	Travel Cost Method (TCM)	54
3.7	Methodology used in the study	55
3.8	Approaches used to elicit preferences	58
3.9	Sampling design	59
3.10	Econometric model	61
3.11	Ordinal regression	62
	References	65
Chapter 4	Urban solid waste- An Overview	68 – 83
4.1	Sources and types of urban solid wastes	68
4.2	Waste generation percapita in countries: cross-country comparison of solid waste generation.	70
4.3	Waste generation per capita in Indian cities.	74
4.4	Solid waste generation and solid waste generation rates	76
4.5	Status of solid waste generation in Kerala	78
4.6	Composition of MSW in Kerala	79
	References	81
Chapter 5	Urban Solid Waste Management Approaches	84 – 91
5.1	Solid waste management: developed and developing countries	84
5.2	Conventional systems of SWM.	87
5.3	Recent developments in USWM	88
5.4	Satellite accounts for waste management	90
	References	91

Chapter 6	Salient Features of the Study Area	92 – 99
6.1	Population growth	93
6.2	Solid waste generation	94
6.3	Chemical characteristics of the solid waste	94
6.4	Financial aspects	95
6.5	Present Solid Waste Management System	96
6.6	Kudumbasree and MSW	98
	References	99
Chapter 7	Micro analysis of the impacts of USWM	100 – 133
7.1	Socio economic characteristics	100
7.2	Impacts of improper solid waste management	104
7.3	Impacts on health	104
7.4	Economic impact	111
7.5	Environmental impact	114
7.6	Social impact	115
7.7	Present status of solid waste management	117
7.8	Valuation for an improvement of the SWM	120
7.9	Cross tabulation of the variables	123
7.10	WTP for the improved SWM programme	124
7.11	Average WTP for the projects	133
Chapter 8	Results of the Study: Statistical Treatment	134 – 151
8.1	Regression analysis for the first municipal project	134
8.2	Regression analysis for the first private project	140
8.3	Regression analysis for the second municipal project	144
8.4	Regression analysis for the second private project	147
	References	151
Chapter 9	Conclusions and Suggestions	152 – 157
	Annexure	158 – 177
	Bibliography	178 – 199
