Acknowledgement

First and foremost, I am thankful to the God almighty for all success during this research work. I pray my tribute to late Sir Dr. Hari Singh Gour, founder of our university.

It is a matter of extreme delight for me to express my sincere, grateful heartfelt thanks and deep sense of gratitude to my supervisor, Prof. K.N. Yadava, Ph.D., F.I.C., Department of Chemistry, Dr. H. S. Gour University, Sagar (M.P.), India, for his keen interest, invaluable guidance, constructive discussion, valuable suggestions and affectionate encouragement during the period of my research work, which helped me to carry out the present investigation.

It is a pleasant privilege for me to express my sincere thanks to Prof. K.S. Pitre, Head, Department of Chemistry, Dr. H. S. Gour University, Sagar (M.P.), for providing all the necessary facilities to carry out this work.

I would like to express my sincere thanks to Prof. V.K. Saxena, Former Head, Department of Chemistry, Dr. H. S. Gour University, Sagar (M.P.) and Prof. S.R. Pawar, Former Head, Department of Chemistry, Gout. Auto. P.G. College, Chhindwara (M.P.) for his valuable suggestions regarding the research problems.

I am grateful to the Head, RSNC, CDRI, Lucknow (U.P.) for recording various spectra incorporated in this thesis. I would like to place my sincere thanks to the Head, Department of Botany, Dr. H. S. Gour University, Sagar (M.P.) for providing the facilities to carry out antimicrobial activities, mentioned in this thesis.

Words become short as I thank to Smt. Sunila Yadava, whose ever-moral boosting nature created such atmosphere, which gave me courage to finish my work successfully.
