ACKNOWLEDGEMENTS

Working for a Ph.D. degree in Chemistry is like embarking on a journey into the unknown, with its twists and turns, ups and downs, moments of stagnation, failure and triumph. What makes the enterprise worth while and fascinating all along, however, are the people one interacts with, ultimately. Infuse it with a significance, purpose and direction far beyond its intrinsic value. If I have arrived somewhere along this journey, I owe it, in no small measure, to the inspiration, guidance and assistance given by a number of people whom it is now my pleasant duty to thank.

In the first place, I wish to express my deepest gratitude to Dr. K.S. Pitre, Reader my Teacher and Supervisor, for his valuable guidance and constructive criticism during the tenure of Ph.D. work. He has been a constant source of inspiration during this long span of time. I acknowledge his efficient collaboration. His joy in chemistry is contagious and I am fortunate to catch it. I exploited his knowledge and interest in the subject. He showed the path and then guided me through thick and thin. His constant encouragement has resulted in me, a confidence which I initially lacked.

I am grateful to Prof. S.P. Banerjee, Head of the Department of Chemistry Dr. Harisingh Gour University, Sagar (M.P.), for his generous help in providing necessary laboratory facilities and amenities in the department.

My sincere thanks are due to Dr. R.K. Trivedi, Reader, Department of Chemistry, Dr. Harisingh Gour University, Sagar (M.P.) and Dr. A.K. Rastogi, Surgeon, Tili District Hospital, Sagar (M.P.) for providing the samples of natural and biological origins, respectively.

My Special thanks to Dr. R.K. Goutam, Reader, Department of Chemistry, Dr. Harisingh Gour University, Sagar (M.P.), for his ever unfailing encouragement. I never forget his care and valuable suggestion. I am also thankful to Mrs. Pitre and Mrs. Goutam for their kind encouragement during the course of my Ph.D. work.

My tender sentiments are for my colleagues Prashant Bhatt, Deepak Barasiya, Ravindra Sharma, Devendra Shama, Swati Nigam, Nidhi Dubey, Shashma Mishra Vandana Khare for their valuable help.

Besides, I am thankful to the M.P. Council of Sc. and Tech., Bhopal for the award of project fellow and Council of Scientific & Industrial Research for Senior Research Fellowship.

I wish to express my thanks to Mr. Sanjay Tiwari, Computer Kendra, Police Lines, Sagar for the proper typing of this thesis and thanks are also due to Lokesh Tiwari for printing of this thesis.

My Expression is perhaps not adequate to express my feeling towards my Papa and Mummy, my Sister Iyati, Brother Anand and Amit for their constant invigoration, understanding and academic moral support and good wishes.
