The present study is on "Locus of control, Aggression and General health of Adolescents: A Correlational study". The main stimulation for undertaking this study was the desire to explore the relationship among locus of control, aggression and general health. But a final touch for a systematic study was given by Dr. PUNAM MIDHA, whose guidance helped me throughout and sustained my interest in the study.

For this purpose a correlation design was used to find out whether there is any relationship between locus of control and different dimensions of health and aggression. A purposive sample of 200 students (100 girls and 100 boys) was selected from public and government schools of Bhiwani (Haryana) on the basis of incidental sampling technique. The age range of the participants is 15 to 18 years. The dissertation has been divided into five chapters. Chapter discusses in brief profile. A brief summary of the study is also given at the end of this dissertation. Appendices schedule used in study and are given after the summary.

It has been my privilege and pleasure to work under the guidance of Dr. Punam Midha, Assistant professor of department of psychology, M. D. University, Rohtak. Her expert supervision energies personality always welcoming nature to students, affected me deeply. My intellectual debt on her is gratefully acknowledged and I welcome this opportunity to record my heartfelt gratitude and sincere thanks to her for her valuable suggestions, able guidance and encouragement at every stage of not only this work but also at every stage of my academic career. I owe a great debt of gratitude to her for encouragement and guidance. She is one of the persons whose name not only written in the dissertation and thesis but also in his students heart. Thank you so much mam, for your perseverance, encouragement and support to complete my dissertation work.

I am thankful to Dr. PROMILA BATRA Professor and Head of the department of psychology, M. D. University Rohtak, for her encouragement and moral support in writing this dissertation. I express my deep gratitude to all the teachers of the department of psychology, M. D. University, Rohtak and Government College, Bhiwani for their support and co-operation.
I also express my thanks to the respondents who participated in this research work. I am also highly thankful to the library staff of the University for their cooperation in providing me the access to the pertinent literature both printed as well as electronic through internet facility. I am extremely thankful to Mr. Pravesh and Mr. Sombir. Also thankful to Renu Duhan, Mamta, Poonam, Suman Malik, Swati, Preeti, Namita for their encouragement, guidance and moral support for this dissertation.

My special thanks are reserved for my father Sh. RamPhal Rahar, my mother RajBala Rahar, whose endless help always sustained my efforts and who have largely contributed to the accomplishment of this task. I am greatly indebted to my grandfather, grandmother, my brothers Aman Rahar, Arun Rahar, Vinay Rahar and Vijay Chahel for the constant encouragements and inspiration and all possible assistance in every shape and form as and when required, to enable me to complete this work.

Last but not the least I am most grateful to God for showering the blessings on me.

POONAM RAHAR
