

List of Tables

3.1	The different planar hybrid films studied with their anchoring strength (ξ) .	78
3.2	The different cylindrical hybrid film systems studied by varying the boundary conditions	92
3.3	Simulation Study 2: Varying ϵ_1 with axial anchoring while keeping the anchoring strength of the outer substrate constant.	97
4.1	The values of all the Γ and Λ values used in equation 4.2.2. (4f system - system with $\Gamma=0.3$ $\Lambda=0.5$, second column refers to Γ values, columns a to k gives the Λ values)	120
5.1	Change ϵ_{nz}	169
