ACKNOWLEDGEMENTS

This thesis has been kept on track and been seen through to completion with the support and encouragement of numerous people including my well wishers, my friends, colleagues and various institutions. It would not have been possible to write this doctoral thesis without the help and support of those kind people around me, to only some of whom it is possible to give particular mention here.

I wish to express my sincere gratitude and heartfelt thanks to my mentor and supervising guide Dr. C. K. K. Nair for the continuous support on my research work, for his patience, motivation, enthusiasm, and immense knowledge. His guidance helped me in all the time of research and writing this thesis. I could not have imagined having a better advisor and mentor for my PhD. Ever since, He has supported me not only by providing a research guidance over almost six years, but also academically and emotionally through the rough road to finish this thesis. And during the most difficult times when writing this thesis, he gave me moral support and freedom I needed to move on. His keen interest and dedication towards science, his versatility for discussing any subject below the sky were very inspiring. I shall always be obliged to him for being patient and kind during the course of my degree.

I gratefully acknowledge Dr. Ramadasan Kuttan, Research Director, Amala Cancer Research Centre, Amala Nagar, Thrissur, whom I always felt very approachable and caring, with utmost regards for the constant support and encouragement during the tenure of my study. I thank him for taking care of even the smallest hurdle I faced during these times.

My sincere thanks to Padmabhooshan Rev. Fr. Gabriel CMI, founder director, Rev. Fr. George Pius CMI, Rev. Fr. Paul Achandy, CMI, Rev. Fr. Thomas Chakramakal, CMI and Rev. Fr. Walter Thelapilly, Director, Amala Cancer Hospital and Research Centre, for permitting me to carry out this work here.

I would like to express my sincere thanks to Dr. V.T. Kagiya, health research foundation, Japan, for providing the compound Sanazole. I am greatly indebted to Dr. Pawan K Khanna, Center for Materials for Electronic Technology (CMET), Pune, for providing the silver nanoparticles. I express my sincere thanks to Prof. K. V. Rao, Dr. L. Belova, Ms. Mei Fang and Mr. K M Sreekanth, Department of Materials Science and Engineering, Royal Institute of Technology Stockholm, Sweden for providing the XRD data on the silver nanoparticles.
I express my sincere gratitude to Dr. Jose Padikkala, Dr. K.K. Janardhanan, Dr. Girija Kuttan, Dr. T.D. Babu and Dr. Achuthan C Raghavamenon, Professors, Amala Cancer Research Centre, for their constant support, help and suggestions.

I am thankful to Dr. Sudheeran, Mr. Muthuvel, Mr. Kathiresan, Mr. Siva and other members of Dept. of Radiotherapy, Amala Institute of Medical Sciences, for their help in radiation studies.

This thesis would have remained a dream had it not been for the support and care from all of my friends and well-wishers at Amala Cancer Research Centre, that helped me in overcoming setbacks and stay focused on my work. A special word of thanks to Dr. Sudha K.S, Dr. Ajith T.A, Fijesh P Vijayan, Liju V.B, Rony Antony, Divyasree Sandeep, Jisha Joy, Dani Mathew, Aditya Menon, Cleetus C.C, Femi Martin, Mrs. C.G Preetha and Mrs. Hemalatha, all other friends and colleagues, for their love, support and help that made me feel part of a truly wonderful family.

I offer my special thanks to Lakshmy R and Dhanya K.C for being with me throughout these years and helping out in all ways possible. In those moments when I felt lost or not capable, I have found support in them. I will always cherish those along with the memories of all fun we had.

My warm thanks are due to my best friend Saratchandran A Divakaran, being with me over these years and understanding me.

I record my sincere thanks to Preethi K.C, Hamsa T.P and Pratheesh Kumar P for the innumerable reference articles they have sent me whenever I pestered them. Ashique Mohammad, entails a special mention for always being at a phone call’s distance to help and instil some much needed confidence in me.

I am thankful to Ms. Thankamani and Mrs. Sumathi, animal house assistants, Amala Cancer Research Centre, for their help in the maintenance and breeding of animals.

I am indebted to Mahatma Gandhi University, Kerala for granting me a research fellowship to pursue my research.

At the end of my thesis, it is a pleasant task to express my thanks to all those who contributed in many ways to the success of this study, made this thesis possible and an unforgettable experience for me.
I would like thank my loving sister Mrs Jayalekshmi Renjith, who has been a part of my life for long, has stood by me at all times and whom I will always be proud of and, my lovely little girl Shivanandhini for sincere encouragement and inspiration during my research and in my life.

I wish to thank my parents, Mr. S. Gopinathan Nair and Dr. S. Vijayalekshmi, who taught me to be loving and forgiving; just and patient; truthful and responsible in all my deeds. They raised me, supported me, taught me, and loved me. I know they have been selfless in providing me the best of everything and all that I have attained in life is because of them. To them I dedicate this thesis.

God has always shown himself to me in all the above people and countless others throughout my life. I am grateful for all these wonderful people, great moments, happiness and all other gifts that You have showered in my life.

Gopakumar G
