ACKNOWLEDGEMENT

"Then which favor of your lord will you deny?"

(13: Sura-e-Rehman)

All the praise to Almighty Allah, the most beneficient and the most merciful through grace of whom, the project undertaken has reached its successful completion.

In retrospect of the year gone by, I realize that this work wouldn't have reached its conclusion without the contribution from many people including my supervisors, teachers, family, friends and many comparatively strangers who helped me during my hour of need because of their sheer goodness of heart. Although, I can never repay anyone of them or the help and guidance that I received, I would like to pen down few words of gratitude.

It has been said that the most thing about getting ahead is getting started and this project could not have started without contribution of my supervisors.

I am indeed blessed to have been associated with my ever affectionate supervisors, Prof. Moshir Ali, Dr. Javed Ali and Dr. Sanjida Baboota, all of them are exemplary academicians with vast knowledge, experience and conviction. The invaluable guidance, unflattering devotion and unapologetic inspiration with constant encouragement, criticisms and suggestions were present throughout the course of my research. The monumental knowledge, expertise and humility of their teaching have added feathers to this work. My regards for them are beyond expression of words.

I sincerely thank Prof. Asgar Ali, Head of Department, of Pharmacapeutics, whose open-mindedness and vast source of knowledge with valuable suggestions and moral support helped me a lot. I also thank him for providing all the necessary facilities in the department and making this project feasible.
I earnestly wish to make special mention to Prof. Rasheeduddin Zafar, Dean, Faculty of Pharmacy, Jamia Hamdard, for his extreme co-operative and moral support throughout the project.

I owe gratitude to (Late) Janob Bacheen Abdul Hameed sb., Founder of Jamia Hamdard, an extraordinary personality with great vision for future, for his devoted efforts to build a great atmosphere for research and education in form of Jamia Hamdard.

Nothing is not enough to express my gratitude to all teachers of my Faculty for their constant encouragement and obdurate co-operation.

A very special word of thanks to my seniors Javed bhai and Shafiq sir, whose experience, guidance and invaluable suggestions facilitate me a lot in my project.

It is indeed a great pleasure to acknowledge the spontaneous, unselfish help and whole hearted co-operation of Saurabh Arora from Arbro Labs & Prakash Chander from WATER Ltd., for their help in development of analytical methodology and pharmaco kinetic analysis.

I also like to acknowledge and thank Indian Council of Medical Research for providing research fellowship, which helped in securing of aspects throughout the project.

All of my friends never stop showering on me in their special way and I am indeed fortunate to have friends like Zaheer, Neeraj, Shahnawaz, Puneet, Nasem, Nitin Saigal, Abu Fahir, Pramod, Akash and Nitin Jain whose love, affection care and support, they bestowed upon me will remain etched in my memories forever.

I am blessed to have friends like Gaurav, Shadab Pathan and Neetu, who selflessly stood by me all the times during my practical work. They have been encouraging, supporting and never away from me, when I needed them the most. They are the pillars of strength that never faltered to stand by me, be it sunshine, clouds or rain.

No words are enough to express what I owe to my parents. I am highly grateful to god to have been gifted with a wonderful family. It's their blessings, prayers, love
and emotional support that have taken me toward this goal. I would also like to thank my sweet sister Asfreen for her love, care and moral support. The love and support of my uncles & aunts and all of my cousins are no less than my own kith and kin and that helped a lot during this journey.

"Many more persons remain unacknowledged, I can only plead in heart are own:"

"Utterest names are sweet.............. but these scattered are sweeter."

Finally, but all above, I have no word to express my thankfulness to Almighty Allah for his blessings with which I not only able to complete the task, but also was taught with new experiences.

Date: 16th November, 2010
