ACKNOWLEDGEMENTS

I have the proud privilege of preparing this thesis under the noble guidance of Dr. Sarwat Sultana, Department of Medical Elementology and Toxicology, Hamdard University. I owe her a deep sense of gratitude for her valuable guidance, fruitful discussion and encouragement through out this work. I have no doubt at all that without her keen interest, constant encouragement, timely advice and constructive criticism, this work would still have been incomplete.

I am deeply indebted to Professor M. Athar, Head, Department of Medical Elementology and Toxicology for unhesitatingly devoted maximum time out of his busy schedule for completing this work and providing me invaluable research facilities.

No word can express the depth of my gratitude to all the teaching staff of the Department of Medical Elementology and Toxicology for giving me full support and providing all facilities from their laboratory for carrying out the present study.

I do not find words to acknowledge the support (direct/indirect) and encouragement given to me by my friends, Dr. Iqbal, Mr. Ghayoor, Mr. Haseeb, Mr. Tanveer, Mr. Hasrat, Mr.G.V. Mishra, Mr. Sanjay, Mr. Ausaf, Mr. Tarique, Mr. Iqbal Sayeed, Mr. Iqbal, Mr. Prashant, Mr. Mukesh, Mr. Zohair, Miss. Saba Ansar, Miss. Saba, Miss. Hena, Miss. Gayatri, Miss. Ayesha, Miss. Laiqa, Miss. Ayesha (Senior), Miss. Shalini, Miss. Sandhaya, and Colleague Mr. Shafi, Mr. Shamsul Arfin, Mr. Aftab, Mr. Salahuddin, Mr. Saleem Bhatt, and Miss. Anjali towards expediting completion of this work and their kind co-operation during the completion of this thesis work. I felt myself lucky in having such a nice colleague and friends.

At this junction, I do not want to miss the privilege of expressing my appreciation to Dr. Shehla Hashim for her help, co-operation and fruitful discussion through out the work. Without this, it would have been next to impossible to complete this work.

I shall be failing in my duty if the help forwarded to me by Mrs. Shaukat Shah, the incharge of Central Animal House, is not acknowledged. I feel obliged for her efforts in arranging the animals even in the summer month of shortage.

The help rendered by non-teaching staff of the Department especially Mr. Babu Khan and Mr. Shahrooz Khan is not to be forgotten. I thank them for their service which they
provided to me very early in the morning while preparing for my experiment.

I have no word to express my deep sense of gratitude to my parents, sisters, and brothers for the encouragement throughout the work of the thesis.

I pay homage to large numbers of rats and mice who sacrificed their lives for the present investigations. Of course without them this work would not have seen the light of the day.

Lastly, I would like to thank the University Grant Commission for the financial aid provided in the form of the Junior and Senior Research Fellowships, during the course of this study.
