ACKNOWLEDGEMENTS

I take this opportunity to extend my gratefulness to Professor S. S. Nigam, Head of the Department of Chemistry, University of Saugor, Sagar, India for suggesting the problem, providing facilities at the Department of Chemistry, University of Saugor and for the guidance during the course of the work at Saugor as well as at Los Angeles.

I feel fortunate in spending two years with Professor James F. Mead, Chief, Biochemistry Division, Laboratory of Nuclear Medicine and Radiation Biology, University of California, Los Angeles. His genuine interest in my work, his encouragement and valuable suggestions during these years were of great help in the completion of this work. I am indebted to Dr. David R. Howton, Professor of Biological Chemistry, Laboratory of Nuclear Medicine and Radiation Biology, who responded with characteristic patience and helpfulness to frequent requests for advice especially on chromatography and spectroscopy. Words are inadequate to express my thankfulness to Dr. G. A. Dhopeshwarkar, Associate Research Biochemist, Laboratory of Nuclear Medicine and Radiation Biology for providing very generous help throughout the laboratory work and for going through the manuscript with critical but friendly eye. It is my pleasure to acknowledge Dr. George Popjak, Professor of Biological Chemistry, School of Medicine, UCLA for helping me with mass spectra.

I am indebted to Professor William G. Clark, Chief, Psychopharmacology Research Laboratories, Veterans Administration Hospital,
Sepulveda, California for his timely help which enabled me to start
the work at Professor Mead's laboratory. I am greatly indebted to
Dr. M. K. Menon, Psychopharmacologist, Veterans Administration Hospital,
Sepulveda (Assistant Professor, Department of Pharmaceutical Sciences,
University of Saugor) for his encouragement and understanding from
start to finish and also for guiding the pharmacology part of the
thesis.

Kind sentiments are extended to Mrs. Rita Bachtold for her
expert typing of the entire manuscript.

I am thankful to Winthrop Laboratories, New York, U. S. V.
Laboratories, Washington and Smith, Kline and French Laboratories,
Philadelphia for the generous gift of the drugs (p 109) used in the
pharmacological studies.

Nirmala K. Menon
