ACKNOWLEDGEMENT

In fact the words elude me to express my deep sense of gratitude and indebtedness to my supervisor Dr. M.S. Kachhawaha, Reader, Department of Chemistry, University of Saugor, Sagar (M.P.) for his valuable guidance, discussion, encouragement, inspiration and counsel throughout the progress of the present work. Inspite of his busy schedule, he managed his valuable time due to which this thesis could take the present shape.

I am also thankful to Prof. Y.G. Kher (Former Head of the Department of Chemistry) and Prof. S.P. Banerjee (Present Head of the Department of Chemistry) University of Saugor, Sagar for providing encouraging facilities during the course of present investigations.

I would like to acknowledge the very stimulating and useful discussions with Dr. K.S. Pitre and with other staff members of the Chemistry Department and also with Dr. D.D. Santani, Reader in Pharmacology, Department of Pharmaceutical Science, University of Saugor, Sagar.

It is a pleasure to offer my thanks to Dr. J.S. Kachhawaha, Reader, Department of Metallurgy and Shri S.P. Singh, Lecturer Department of Electrical Engineering Institute of Technology, B.H.U. for enabling me to record
the atomic absorption spectra, electronic spectra and IR spectra.

My sincere obligations are also due to ICMR, New Delhi for the award of J.R.F. to me.

The debt I owe to my revered father Dr. R.R. Singh, Former Head of the Department of Mathematics, Udai Pratap College Varanasi, eludes articulation.

I wish to owe my profoundest gratitude to my husband Er. S.P. Singh, Assistant Engineer, M.P.E.B., Sagar, who has smilingly embraced the obvious suffering and whose constant encouragement has always filled a new spirit and enabled me to complete the present work.

Last but not least, I also express my sincere thanks to Deousker Brothers, (Shrikrisnha Typing Institute) Sagar for neat and clean typing and Xerox work.

Dated: 9-8-85

(Smt. Pramila Singh)
