the very outset I express my heartfelt gratitude to Dr. V. Tiwary who was kind enough to act as my supervisor. I really feel highly indebted to him for his learned guidance and keen interest throughout the tenure of my teacher fellowship. This thesis is the outcome of his unstinted help in both theoretical as well as experimental work and discussions. I have no words to express my gratitude to him.

I am also grateful to Dr. V. Thakur, Professor and Head of the Physics Department, Ravishanker University, Durgapur for providing me various facilities necessary for carrying out the research work in the Department. I am also thankful to all members of the staff and friends in the Physics Department of the University for extending to me their whole-hearted cooperation throughout.

I must take it as my foremost duty to thank Dr. C.B.R. Verma, Ex-Principal, Govt. Arts & Science College, Durg for inspiring me in taking up the research work. I am also thankful to Prof. S.V. Hatnam, Director, I.I.S Coaching Centre and Prof. B.L. Krishnaswathi, Principal, Govt. F.G. College, Bilaspur for their constant encouragement throughout thereafter. The cooperation which was extended to me by my ex-colleagues at Durg and by my present colleagues at Bilaspur is highly commendable. I am thankful to them all.
I can never forget the timely assistance provided to me by my revered teacher, Prof. K.A. Raman, Head of the Physics Department, C.M.D. P.G. College, Bilaspur in enabling me to continue my higher studies. I owe my real indebtedness to him.

My sincere thanks are due to Dr. K.P. Sarbhai, Head of the Physics Department, Govt. Science College, Raipur and Dr. J.B. Rao, Department of Physics, Govt. Arts & Science College, Lurug whose experience as research workers not only helped me in streamlining my own work but also gave me their invaluable suggestions in the completion and submission of this thesis. My other colleagues in the ferroelectric research group viz. Shri M.P. Gupta and Miss Vijay Chand also reserved my thanks for the cooperation extended.

I would fail in my duty if I do not thank Drs. Tiwary who had to face all inconvenience on account of my presence off and on for discussions with Dr. Tiwary.

I am also thankful to the staff of JSS, Davishanker University for helping me in fabrication of apparatus and other repairing works.

I acknowledge with thanks the financial assistance received and teacher fellowship awarded to me by the University Grants Commission and Education Department, Government of Madhya Pradesh.
