CONTENTS

1.0 INTRODUCTION
1.1 Medicinal plants – History and context
1.2 Natural antibiotic properties of plant secondary metabolites
1.3 Antimicrobial activity of plants
1.4 Antioxidant potential of medicinal plants
1.5 Importance of plants in anticancer activity
1.6 Medico-Ethno botanical survey

2.0 REVIEW OF LITERATURE
2.1 Plants with antimicrobial activity
2.2 Antioxidant activity of plants
2.3 Plants with anticancer properties
2.4 Plants that induce apoptosis
2.5 Scope of Sansevieria roxburghiana

3.0 AIMS AND OBJECTIVES
4.0 MATERIALS AND METHODS

4.1 Procedure for plant analysis
4.2 Phytochemical screening
4.3 Antimicrobial activity
4.4 Thin layer chromatography
4.5 Antioxidant potential of S. roxburghiana leaves
4.6 Anticancer activity of S. roxburghiana leaves
4.7 Apoptosis of HepG2 cell line
4.8 Gas chromatography-mass spectrometry analysis (GC-MS)
4.9 Statistical analysis

5.0 RESULTS

5.1 Percentage yield of solvent extracts
5.2 Phytochemical screening
5.3 Antimicrobial activity
5.4 Thin layer chromatography
5.5 Antioxidant potential of S. roxburghiana
5.6 Anticancer activity of S. roxburghiana
5.7 Apoptosis of HepG2 cells
5.8 GC-MS analysis

6.0 DISCUSSION

6.1 Phytochemical screening
6.2 Antimicrobial activity
6.3 Thin Layer Chromatography
6.4 Antioxidant potential of S. roxburghiana
6.5 Anticancer activity of S. roxburghiana
6.6 Apoptosis of HepG2 cells
6.7 GC-MS analysis

7.0 SUMMARY
Mass spectra of GC-MS chromatogram of Graph 1
Suggestions for future research
