Acknowledgements

This thesis emerged out of years of research carried after I joined University of Hyderabad. By that time, I have worked with many great scholars whose contribution in assorted ways has its mark on this dissertation. It is a pleasure to convey my gratitude to them all in my humble acknowledgement.

In the first place I would like to record my gratitude to Professor Panchanan Mohanty for his supervision, advice and guidance from the very early stage of this research. Above all and the most needed, he provided me unflinching encouragement and support in various ways.

It is also a pleasure to express my gratitude wholeheartedly to Professor Mohanty's family, namely Dr Smita Mohanty, Puplu and Lublu, for entertaining me and my family quite often making our stay in Hyderabad homely, more pleasant and more comfortable.

I would like to express my thanks to Professor Uma Maheshwar Rao, Head of the Centre for Applied Linguistics and Translation Studies and all professors and doctors of the Centre. I also would like to express my thanks to the members of my research committee, Professor P. D. Dadegaunkar and Professor Uma Maheshwar Rao. My thanks go to the Dean of the School, Prof. M. G. Ramanan, too.

I am much indebted to Dr Andrew Goatly, University of Hong Kong for his valuable discussion, and for providing me with the manuscript of his book entitled *Explorations in Stylistics*. I am also grateful to Dr. Peter Tan, National University of Singapore for his prompt response in sending me Goatly's booklet *Buddhist Lexico-Grammar in Golding's Pincher Martin*. I would also like to thank Professor Christopher Cleirigh, University of Sydney, for his extremely useful inputs and explanations on systemic linguistics.
My sincere thanks to Mr. Abdullah Saleh Aziz for proofreading the final draft of this thesis. I am also grateful to Dr. Abdul Malik Mansour Saleh Saif for reviewing the last draft of the bibliography. I also would like to convey my thanks to Mr. Amer Ali Sallam Farea for his help in the printing of this dissertation.

Collective acknowledgement is also owed to CALTS office staff, Ms. B. Anuradha, Dr. A. Appa Rao, Mr. PVSR. Murthy and Mr. D. Mallesh, who were helpful and cooperative during my study in the Centre.

Where would I be without my family? My brothers and sisters deserve special mention. I thank my brothers Ali, Abdullah, and Nabeel, and my sisters Hana'a, Mona, Hend and Samah for their financial and moral support throughout my research period. In such moments, I can never forget my father and my mother whose spirits have always been there an incentive to the achievement of this dissertation.

I can never express with words how important the loving support of my wife and children has been to me. Anisa, Hend (Hanadi), Samah and Arsalan, thank you for your dedication, support and everlasting patience.
