ACKNOWLEDGEMENTS

It will always be a matter of pride and honour for me to be a student of Jamia Hamdard, New Delhi. Words fail me as I try to thank our Late Hakim Abdul Hameed Saheb for his immeasurable contribution to the field of education. I want to thank the Vice Chancellor, Dr. Shanim Ahmed and the University for providing me an opportunity to work here.

First and foremost, I would like to express a deep sense of gratitude and regards to my guides, Dr. Alka Ahuja and Prof. Roop K. Khar. Hard work, perseverance and targeting nothing less than the “best” are keys to success; this I learnt from them. Their principles and discipline are unmatched and a source of motivation for all those who get an opportunity to be associated with them. Their friendly nature, helpful attitude, being present when needed most and dedication to work have been beyond comparison. As supervisors, they inculcated in me the habits of independent thinking and time management besides developing self-confidence.

I owe a special word of thanks to Dr. T. Velpandian for his unstinting support towards completion of my dissertation.

My deepest gratitude for Prof. Mushir Ali and Prof. S.H. Ansari for their timely help and support as and when required.

I want to pay my sincere respect to my teachers, Dr. Farhan Jalees Ahmad, Dr. Javed Ali, Dr. Sanjula Baboota, Dr. Kanchan Kohli, Dr. Yasmin Sultana, Dr. Mohd. Aquil, Dr. Sushma Talegaonkar and Dr. Zeenat Iqbal for their timely support throughout the course of this project.

I would be failing in my duties, if I do not acknowledge the whole-hearted support of Dr. Rajesh Khanna, Biju Benjamin, Dr. Alok Kumar Ravi and Tathagata Dutta. They provided me with a constant influx of ideas and were available whenever I needed them.

My sincere gratitude is due to my seniors, colleagues and friends Ritesh, Rahul, Jasjeet, Shweta, Saima, Rajeshwari, HarmeeK and Aftab for their invaluable assistance and constant support.

I also want to acknowledge the help of my dear friends Heena, Ishrina, Seema and Kanchan.
The access to state of the art equipment, as well as the assistance in using this equipment was essential for a good quality research work. A special thanks goes to Dr. Ganguly for his advice and help on nanoparticles characterization by DLS, Prof. S. S. Chauhan for helping me out with in vitro cytotoxicity studies and Sandeep sir for his guidance and support on samples characterization by TEM.

My colleagues and friends in the Pharmacokinetics Lab, AIIMS, especially Kumari, Charu, Gaurav, Rohit, Gayatri, Smrita, Nirmal, provided a very pleasant atmosphere in the lab and it was a joy working with them.

Grateful acknowledgement is made to ICMR, New Delhi for the financial help and support provided for the work. I am grateful to Dabur Research Foundation for the generous gift sample of Paclitaxel.

I would also like to thank the non-teaching staff of Department of Pharmaceutics, Jamia Hamdard and Department of Ocular Pharmacology and Pharmacy, AIIMS, for their timely help and assistance whenever required.

I am indebted to my Parents, Late Father-in-law, Mother-in-law, Jiji, Rohina and Rohit bhaiya and I offer my sincere regards and gratitude to them for sailing me and supporting me in the most testing times.

Finally, I don’t want to demean the love and support of the most important person in my life, my husband Viney, by thanking him. He has been a constant source of moral support, patience, and humor when things were not always easy as well as his technical assistance was vital for completing my projects in a timely manner. I know that I am a better person and have accomplished more because of him. The completion of this work is as much for him as it is for myself.

In the end, I want to thank the almighty for getting me to a stage to be able to write all this and pushing me towards the fulfillment of a long cherished dream.

Deepti Pandita
