With great pleasure, I express my gratitude for the guidance and support given by my guide Dr. B.N. Paul (Scientist 'F' and Head Immunobiology Laboratory, Indian Institute of Toxicology Research, Lucknow.) for completing and bringing out this work. I also thank him for giving me an opportunity to work under his guidance and showing confidence in my abilities despite all odds. Without his vision, encouragements and efforts for making things run in a smooth way, it would not have been possible for me to complete this work by which I can achieve new goals of my scientific career.

I feel myself privileged to work under my esteemed co-guide Dr. S. Raisuddin for his inspiring guidance, healthy criticism, invaluable suggestions and constant encouragement throughout the period of study. He is the person who inspired me for this work and showed me different ways to approach a problem and how to deal with it in a fruitful manner. He also encouraged me in the hours of great despair and dissolution during the long journey of this academic exercise. He boosted my morale at every stage of this research work.

I owe gratitude to Director, IITR, and Lucknow for allowing me to start this research work and helping me to come up with the best possible outcome.

I express my sincere thanks to Prof. Sarwat Sultan, Head, Department of Medical, Elementology and Toxicology for guidance and encouragement.

I would also like to convey my thanks to Prof. M.Z. Abdin, Dean, and Faculty of Science for his timely help.

My special thanks are due to Dr. D. C. Purohit, Dr. Dhirendra Singh, Dr. Mahadeo Kumar and all Animal House staff for their kind cooperation in providing me animals and taking care of them throughout this study.

I take this opportunity to convey thanks to Mr. Pradeep Kumar Singh, for his expert technical advice and useful suggestions. I am also thankful to Dr. M.K. Reddy, Dr. R.C. Murthy and Dr. Pradeep Kumar for their constant encouragement.

My special thanks are for Vani, Jasmeet, Shambhoo, Mukesh, Mamta and Ruchi for help and co-operation during the work.
I owe special thanks to friends, colleagues at IITR especially and who stood as pillars giving unstrained and constructive encouragement and craved to see this day of life.

I feel short of vocabulary to express my heartfelt gratitude to my mother Shrimati Vimal and father late shri Pradosh Chaudhari I am truly blessed to be your son. I am also thankful to my beloved wife Mrs. Shital and son Rahul for their patience during the completion of my work.

This work would not have been completed without the supreme sacrifices of numerous animals used in various experiments. I sincerely ask for forgiveness from God almighty for the life of one of his beautiful creations even though the very act was meant for the betterment of thousands of suffering men and women.

Lastly, I would like to thank the God almighty for showing blessings on me and for providing me the strength and capacity to complete this important chapter of my life.

Bhushan Chaudhari
