List of Figures

Chapter 2

2.1 Free trace metal concentrations in soils solution 14
2.2 Occurrence of metal ions in various pools 14
2.3 Key processes governing the partition of metals between the solid and solution phases of soils 15
2.4 Metal mobility and soil metal retention capacity 15
2.5 Schematic of the solid solution interface 20
2.6 A schematic view of sorption in a soil water system 22
2.7 Forces and mechanisms in adsorption 23
2.8 The three mechanisms of cation adsorption on a siloxane surface (e.g., montmorillonite) 27
2.9 Adsorption of heavy metal cations on goethite 35
2.10 Mechanisms of complexation of heavy metal cations with natural organic matter 42
2.11 Adsorption, precipitation and ageing processes in soil 51
2.12 Mineral surfaces and bioavailability of heavy metals: A molecular-scale perspective 52
2.13 Examples of different adsorption isotherms 56
2.14 Major soil types of Chhattisgarh 65
2.15 Soil drainage of Chhattisgarh 66
2.16 Soil depth in Chhattisgarh 67
2.17 Dominant parent material for soils of Chhattisgarh 68
2.18 Dominant surface forms in Chhattisgarh 69
2.19 Major industrial estates in Chhattisgarh 76

Chapter 3

3.1 Kanhar (Vertisol) soil 82
3.2 Dorsa (Alfisol) soil 83
3.3 Matasi (Inceptisol) soil 84
3.4 Bhata (Entisol) soil 85

Chapter 4

4A X-ray diffraction diagram for Kanhar (Vertisol) 104
4B X-ray diffraction diagram for Dorsa (Alfisol) 105
4C X-ray diffraction diagram for Matasi (Inceptisol) 106
4D  X-ray diffraction diagram for Kanhar (Vertisol) 107
4.1  Sorption kinetics for copper 109
4.2  Sorption kinetics for cadmium 109
4.3  Sorption kinetics for chromium 109
4.4  Effect of pH on copper sorption 110
4.5  Effect of pH on cadmium sorption 111
4.6  Effect of pH on chromium sorption 111
4.7  Copper adsorption isotherm for Kanhar (Vertisol) 113
4.8  Cadmium adsorption isotherm for Kanhar (Vertisol) 114
4.9  Chromium adsorption isotherm for Kanhar (Vertisol) 114
4.10  Langmuir isotherm parameters for Cu adsorption on Kanhar (Vertisol) 115
4.11  Freundlich isotherm parameters for Cu adsorption on Kanhar (Vertisol) 115
4.12  Langmuir isotherm parameters for Cd adsorption on Kanhar (Vertisol) 115
4.13  Freundlich isotherm parameters for Cd adsorption on Kanhar (Vertisol) 115
4.14  Langmuir isotherm parameters for Cr adsorption on Kanhar (Vertisol) 115
4.15  Freundlich isotherm parameters for Cr adsorption on Kanhar (Vertisol) 115
4.16  Effect of ionic strength on sorption of Cu on Kanhar (Vertisol) 116
4.17  Effect of ionic strength on sorption of Cd on Kanhar (Vertisol) 117
4.18  Effect of ionic strength on sorption of Cr on Kanhar (Vertisol) 117
4.19  Effect of competing anions on Cu sorption by Kanhar (Vertisol) 118
4.20  Effect of competing anions on Cd sorption by Kanhar (Vertisol) 119
4.21  Effect of competing anions on Cr sorption by Kanhar (Vertisol) 119
4.22  Effect of calcium on Cu sorption on Kanhar (Vertisol) 120
4.23  Effect of calcium on Cd sorption on Kanhar (Vertisol) 121
4.24  Effect of calcium on Cr sorption on Kanhar (Vertisol) 121
4.25  Effect of organic matter removal on Cu sorption on Kanhar (Vertisol) 123
4.26  Effect of organic matter removal on Cd sorption on Kanhar (Vertisol) 123
4.27  Effect of organic matter removal on Cr sorption on Kanhar (Vertisol) 124
4.28  Effect of Fe – Mn oxides on Cu sorption on Kanhar (Vertisol) 125
4.29  Effect of Fe – Mn oxides on Cd sorption on Kanhar (Vertisol) 126
4.30  Effect of Fe – Mn oxides on Cr sorption on Kanhar (Vertisol) 126
4.31  Effect of EDTA on Cu sorption on Kanhar (Vertisol) 128
4.32  Effect of EDTA on Cd sorption on Kanhar (Vertisol) 128
4.33  Effect of EDTA on Cr sorption on Kanhar (Vertisol) 129
4.34  Effect of compost application on Cu sorption on Kanhar (Vertisol) 129
4.35 Effect of compost application on Cd sorption on Kanhar (Vertisol) 131
4.36 Effect of compost application on Cr sorption on Kanhar (Vertisol) 131
4.37 Sequential extraction of Cu, Cd, and Cr from Kanhar (Vertisol) 134
4.38 Cu adsorption isotherm for Dorsa (Alfisol) soil 137
4.39 Cd adsorption isotherm for Dorsa (Alfisol) soil 137
4.40 Cr adsorption isotherm for Dorsa (Alfisol) soil 138
4.41 Langmuir linear fit for Cu adsorption on Dorsa (Alfisol) 139
4.42 Freundlich linear fit for Cu adsorption on Dorsa (Alfisol) 139
4.41A Langmuir linear fit for Cd adsorption on Dorsa (Alfisol) 139
4.42B Freundlich linear fit for Cd adsorption on Dorsa (Alfisol) 139
4.41C Langmuir linear fit for Cr adsorption on Dorsa (Alfisol) 139
4.42D Freundlich linear fit for Cr adsorption on Dorsa (Alfisol) 139
4.43 Effect of ionic strength on sorption of Cu on Dorsa (Alfisol) 140
4.44 Effect of ionic strength on sorption of Cd on Dorsa (Alfisol) 141
4.45 Effect of ionic strength on sorption of Cr on Dorsa (Alfisol) 141
4.46 Effect of competing anions on Cu sorption on Dorsa (Alfisol) 143
4.47 Effect of competing anions on Cd sorption on Dorsa (Alfisol) 143
4.48 Effect of competing anions on Cr sorption on Dorsa (Alfisol) 144
4.49 Effect of calcium ions on Cu sorption on Dorsa (Alfisol) 144
4.50 Effect of calcium ions on Cd sorption on Dorsa (Alfisol) 145
4.51 Effect of calcium ions on Cr sorption on Dorsa (Alfisol) 146
4.52 Effect of organic matter removal on Cu sorption by Dorsa (Alfisol) 147
4.53 Effect of organic matter removal on Cd sorption by Dorsa (Alfisol) 148
4.54 Effect of organic matter removal on Cr sorption by Dorsa (Alfisol) 148
4.55 Effect of Fe, Mn Oxides on Cu sorption on Dorsa (Alfisol) 149
4.56 Effect of Fe, Mn Oxides on Cd sorption on Dorsa (Alfisol) 150
4.57 Effect of Fe, Mn Oxides on Cr sorption on Dorsa (Alfisol) 150
4.58 Effect of EDTA on Cu sorption on Dorsa (Alfisol) 151
4.59 Effect of EDTA on Cd sorption on Dorsa (Alfisol) 152
4.60 Effect of EDTA on Cr sorption on Dorsa (Alfisol) 152
4.61 Effect of compost on Cu sorption on Dorsa (Alfisol) 154
4.62 Effect of compost on Cd sorption on Dorsa (Alfisol) 154
4.63 Effect of compost on Cr sorption on Dorsa (Alfisol) 155
4.64 Sequential extraction of metals from Dorsa (Alfisol) 158
4.65 Cu adsorption isotherm for Matasi (Inceptisol) 161
4.66 Cd adsorption isotherm for Matasi (Inceptisol) 161
4.67 Cr adsorption isotherm for Matasi (Inceptisol) 162
4.68 Linear fit for sorption isotherms for sorption of Cu, Cd, and Cr on Matasi 163
4.69 Effect of ionic strength on sorption of Cu on Matasi (Inceptisol) 165
4.70 Effect of ionic strength on sorption of Cd on Matasi (Inceptisol) 165
4.71 Effect of ionic strength on sorption of Cr on Matasi (Inceptisol) 166
4.72 Effect of competing anions on Cu sorption by Matasi (Inceptisol) 166
4.73 Effect of competing anions on Cd sorption by Matasi (Inceptisol) 167
4.74 Effect of competing anions on Cr sorption by Matasi (Inceptisol) 167
4.75 Effect of calcium ions on Cu sorption by Matasi (Inceptisol) 168
4.76 Effect of calcium ions on Cd sorption by Matasi (Inceptisol) 169
4.77 Effect of calcium ions on Cr sorption by Matasi (Inceptisol) 170
4.78 Effect of organic matter removal on Cu sorption on Matasi (Inceptisol) 170
4.79 Effect of organic matter removal on Cd sorption on Matasi (Inceptisol) 171
4.80 Effect of organic matter removal on Cr sorption on Matasi (Inceptisol) 172
4.81 Effect of Fe, Mn Oxides on Cu sorption on Matasi (Inceptisol) 172
4.82 Effect of Fe, Mn Oxides on Cd sorption on Matasi (Inceptisol) 173
4.83 Effect of Fe, Mn Oxides on Cr sorption on Matasi (Inceptisol) 174
4.84 Effect of EDTA on Cu sorption on Matasi (Inceptisol) 174
4.85 Effect of EDTA on Cd sorption on Matasi (Inceptisol) 176
4.86 Effect of EDTA on Cr sorption on Matasi (Inceptisol) 176
4.87 Effect of compost on Cu sorption on Matasi (Inceptisol) 178
4.88 Effect of compost on Cd sorption on Matasi (Inceptisol) 178
4.89 Effect of compost on Cr sorption on Matasi (Inceptisol) 179
4.90 Sequential extraction of metals from Matasi (Inceptisol) 182
4.91 Cu adsorption isotherm for Bhata (Entisol) 185
4.92 Cd adsorption isotherm for Bhata (Entisol) 186
4.93 Cr adsorption isotherm for Bhata (Entisol) 186
4.94 Linear fit for sorption isotherms for sorption of Cu, Cd, and Cr on Bhata 187
4.95 Effect of ionic strength on sorption of Cu on Bhata (Entisol) 188
4.96 Effect of ionic strength on sorption of Cd on Bhata (Entisol) 189
4.97 Effect of ionic strength on sorption of Cr on Bhata (Entisol) 189
4.98 Effect of competing anions on Cu sorption on Bhata (Entisol) 191
4.99 Effect of competing anions on Cd sorption on Bhata (Entisol) 191
4.100 Effect of competing anions on Cr sorption on Bhata (Entisol) 192
4.101 Effect of calcium ions on Cu sorption by Bhata (Entisol)  192
4.102 Effect of calcium ions on Cd sorption by Bhata (Entisol)  194
4.103 Effect of calcium ions on Cr sorption by Bhata (Entisol)  194
4.104 Effect of organic matter removal on Cu sorption on Bhata (Entisol)  195
4.105 Effect of organic matter removal on Cd sorption on Bhata (Entisol)  196
4.106 Effect of organic matter removal on Cr sorption on Bhata (Entisol)  196
4.107 Effect of Fe, Mn Oxides on Cu sorption on Bhata (Entisol)  198
4.108 Effect of Fe, Mn Oxides on Cd sorption on Bhata (Entisol)  198
4.109 Effect of Fe, Mn Oxides on Cr sorption on Bhata (Entisol)  199
4.110 Effect of EDTA on Cu sorption on Bhata (Entisol)  199
4.111 Effect of EDTA on Cd sorption on Bhata (Entisol)  201
4.112 Effect of EDTA on Cr sorption on Bhata (Entisol)  201
4.113 Effect of compost on Cu sorption on Bhata (Entisol)  202
4.114 Effect of compost on Cd sorption on Bhata (Entisol)  203
4.115 Effect of compost on Cr sorption on Bhata (Entisol)  203
4.116 Sequential extraction of metals from Bhata (Entisol)  206
4.117 Multiple metal sorption isotherms for Kanhar  210
4.118 Multiple metal sorption isotherms for Dorsa  210
4.119 Multiple metal sorption isotherms for Matasi  211
4.120 Multiple metal sorption isotherms for Bhata  211
4.121 Column sorption experiment with multiple metal spiked rain water  217
4.122 Column leaching experiment with natural rain water  217
