ACKNOWLEDGMENT

An endeavor comes out successfully not by one individual’s efforts. There are many artisans involved in bringing my dream come true. And the thesis would remain incomplete if I do not articulate my deep sense of gratitude to all responsible for making me capable of writing this acknowledgment note. It was only with the blessings, infusion of ideas, keen surveillances, encouragement and intermittent corrections of my teacher and guide Prof. Syed Sarfaraz Ali, M. Sc., Ph. D., F. B. S., Professor and Head, School of Life Sciences, Pt. Ravishankar Shukla University, Raipur, that I could take up this problem, get involved in it and eventually completed it successfully.

I must extend my deep sense of gratitude and heartfelt thanks to all my teachers esp., Dr. V. Rai for his guidance at every stage of my experimental work, Dr. A. K. Pati for having incurred into me the interest in computers & its applications, Dr. A. K. Gupta for helping me in microphotography and to Dr. G. B. K. S. Prasad for his constant advises and help.

I wish to thank The Director, National Facility for Animal Cell and Tissue Culture (Department of Biotechnology), Pune for providing me cell lines promptly. Financial assistance given by University Grants Commission, New Delhi is gratefully acknowledged.

The research scholars of the department and my friends outside the department had been a constant source of help and competition, for which I thank them sincerely. I thank the technical and non technical staff of the department for extending me help and service at the time of need.

Lastly, I lost for words to express all that I feel for my family members and relatives, who extended me the moral support and love all along.

(Prasad A. Wadegaonkar)
