ACKNOWLEDGEMENTS

My grateful acknowledgement is due to Dr. H. Kumar, Professor and Head, Department of Chemical Engineering, Government Engineering College, Raipur for his adept guidance, invaluable suggestions and constant co-operation at all stages of this work. His willingness to help, unfailing support and approval played a preponderant part in the completion of this work. I, further, express my deep sense of indebtedness to him for providing the requisite facilities in the department to carry out this piece of research work.

I am thankful to Mr. Ashok Kumar, Officer-in-charge Computer, State Bank of India, Raipur who helped me a lot during computer data processing.

My sincere thanks are due to Late Mr. R.K. Pradhan, Tech. Asstt., of the Chemical Engineering Department for fabrication of the experimental setup and his assistance in conducting experiments.

Finally, I wish to express my grateful thanks to my husband, Mr. S.C. Soni, for his continuous inspirations, constant co-operation and for giving me company during night hours and to my sons Ankur and Anshuman for their naughty but constructive suggestions on how to manage household and research work simultaneously.

(MRS. A.B. SONI)
