God is always with us, above us to bless us, below us to support us, before us to guide us, behind us to protect us, besides us to comfort us and inside us to sustain us.

A single flower cannot make a garden or a single star cannot make the beautiful shiny sky same way a research work can never be outcome of a single individual’s talent or efforts. During my journey from objective to goal, I have experienced shower of blessings, guidance and inspiration from my parents, teachers, friends, all my well wishers and almighty God, who have given me the-right direction and made it to achieve the goal. Although it is not possible for me to name and thank them all individually, but it is great pleasure for me to pen down some of the special personalities who have made it possible for me to put this research work in present form.

I owe a special word of thanks to my mother in-law and father in-law. I will never forget their continuous encouragement throughout my course of study. I am also thankful to my lovely brother & sister who have helped me a lot. It is only because of their love, affection and motivation that I am at this step of success.
