ACKNOWLEDGEMENT

A journey is easier when you travel together. Interdependence is certainly more valuable than independence. This thesis is by far the most significant scientific accomplishment in my life and is the end of my long journey in obtaining my degree of doctorate. I have not traveled in a vacuum in this journey. In retrospect of the years gone by, I realize that this work wouldn't have reached its conclusion without the contribution from many people including my supervisors, colleagues, friends, family, teachers, my students and many comparatively strangers who helped me during my hour of need because of their sheer goodness of heart. Many people pushed me into this project, many have helped me not to get lost during the development of this thesis and made this journey easier with words of encouragement and more intellectually satisfying by offering dimensions to look to expand my theories and ideas. Although, I can never repay anyone of them or the help and guidance that I received, I have the opportunity to express my gratitude for all of them as the minimum gesture for being indebted. This is an impossible task, I am going to try anyway, and if your name is not listed, rest assured that my gratitude is not less than for those listed below.

The chain of my gratitude would be definitely incomplete if I would forget to thank the first cause of this chain, The Almighty. With least expression, my deepest and sincere gratitude to Him for enabling, inspiring and guiding this humble being.

It has been said that the main thing about getting ahead is getting started and this project could not have started without contribution of my guides.

Its indeed a privilege to have worked under the esteemed guidance of Prof K. K. Pillai, who accepted the responsibility of supervision. I have a twenty-eight years long association with him, as his student, post graduate scholar and subordinate. His overly enthusiasm and integral view on research and his mission for providing only high-quality work and not less, has made a deep impression on me. I thank him for being kind and patient while editing this text also for providing all the necessary facilities in the department and making this project feasible.

I also feel proud to have worked under esteemed supervision of a great scientist and academician, Prof Mohammad Ali. His vast and deep knowledge and experience were the
inspiring forces in the work. I thank him for his guidance and providing me with the requisite facilities for phytochemical work.

Dr Surender Singh is blessing in form of perfect guide not only for me, but also for many gone and many more to come. It was he who suggested this kind of unconventional innovative type research problem in the area of traditional medicine. Dr Surender Singh is an exemplary man with vast knowledge, untiring devotion and conviction. His wisdom, able guidance, supervision, patience and encouragement, present throughout the course of study, are the forces behind the successful completion of this work. An excellent supervisor, he was as close as a relative and a good friend to me. His principle, to see the good in everything and be a constructive part of the whole, made me feel responsible. My regards for him are beyond expression of words.

I pray that the soul of our beloved Founder Chancellor, (Late) Hakim Abdul Hameed Saheb, may rest in peace. “Aameen”. He was an extraordinary personality with great vision for future, the Founder of Jamia Hamdard, his devoted efforts to build a great atmosphere for research and education in form of Jamia Hamdard.

My best regards are for Prof J S Qadry and Mr Syed Zakir Husain, who are not only my teachers but also mentors of my professional foundation and career. Mr S Z Husain constantly inspired, encouraged and facilitated me for attaining higher education. This thesis is the reflection of his blessings, unwavering support, and all this has placed me where I am today.

Words are insufficient and inadequate to express my gratitude to Mr Shoaib Ahmad. His advises knowledge, technical expertise, innovative ideas helped me a lot, especially in the experimental work, as well as in writing work and in staying at the right track and surmount many many obstacles that came in way. He was instrumental in creation of congenial environment during the long working hours. It would not have been possible to give direction to my efforts without his dynamic support.

I am blessed to know Dr Javed Ali, a man with extraordinary caliber, qualities and potentials. He was too supportive, helpful and had an indispensable place throughout. He worked out to get things formal in a correct way. Thank you doesn’t seem sufficient but it is said with appreciation and respect.
I owe special thanks to Dr Farhan J. Ahmad and Dr A K Najmi, my promoters, who kept an eye on the progress of my work and were always available. They helped me step by step at all times, and by their impetus my tardy-pacing thesis, received momentum.

I thank you Mr Nazam Ansari and Dr Shadab Zafar for the generous, spontaneous and wholehearted help and co-operation in all times of need. I had the pleasure to work with several scholars, Mr Onkar Singh, Mr Suhel who were of great help in my experimental work. Thanks are due for their cheerful help and for the excellent work environment, also to Mr Rafiullah, Mr Abdul Wadood.

Due appreciation and gratitude to Prof (Mrs) P. K. Pillai for permitting me to carry out the biochemical estimations at Pathology Lab, Majeedia Hospital. Heartfelt thanks to the technical staff of pathology laboratory, Majeedia Hospital, for their technical help. It was a pleasure to work with Mrs Amini, Mrs Lisy, Mrs Rosamma, Mrs Beena, Mr Nadeem, Mr Muqeem, Mr Azhar who gave me more than just a lab space.

My deepest thanks to Dr Nomaan Jameel, Ex-pathologist, BARC Hospital, Mumbai, and Dr (Mrs) Nafees Nomaan for helping me out with histopathological studies.

A special thanks to Dr Ayaz Ali for his generous, spontaneous and wholehearted help and co-operation in all times of need. The selfless help and support given by Mr Q P Rana played central role throughout my work and made it easy and pleasurable. Many, many thanks to him. Memories treasure the moral support and encouragement by Mr. Suresh C. Sharma. Appreciation and thanks is due to Mr M. Imran for the help he rendered in photomicrography.

I am in debt to Mrs Shaukat A. Shah for the motivation, encouragement, suggestions and for being kind to provide the animals for this work. Thanks also to the staff of animal house facility, Jamia Hamdard.

Personal thanks are due to numerous people, especially Mr Hasan Abdullah, Mr M. Akhtar, Dr T. A. Siddiqui, Dr Asif for support in times of crisis. The 'essential distractions', to keep the tract, provided by Dr Mymoona Akhtar need a special mention and thanks!
The co-operation and support of all the library staff at IARI, Delhi; Jamia Hamdard; Faculty of Pharmacy; NML and ICMR, Delhi, is deeply acknowledged.

Inundated with comments, agreements and disagreements of my colleagues removed all the immovable obstructions and made the time memorable. I do not have much audacity to wrap up the indefatigable and myriad efforts and contributions rendered by them, specially Dr Anshu Manocha, Dr Divya Vohra, Mrs Kiran Dubey, Dr Uma Bhandari. Also for Dr Manju Sharma, for her encouragement and lively discussions. Mrs Razia Khanam will be remembered for her gift pen to sign the thesis, patience when unknowingly I broke the queue, and the complements!

The support, help and much-needed co-operation beyond the call of duty rendered by Mr. Mushtaq and Mr. Sohrab deserves special mention, appreciation and thanks. I would also like to thank the supporting staff, Mr Imamudeen, Mr Iqbal Ahmad, Mr Sharfuddeen, Mr Matloob and Mr Saleem Ahmad for their help.

No words are enough to express my feelings for my parents. I believe I owe deepest apology and gratitude both, to my family, specially my daughter, Azma. For it was solely their time and attention, which I stole to pursue this work. They had to sacrifice their share, which they did with utter patience. It is too big a cost that they had to pay.

As always it is impossible to mention everybody who had an impact to this work: Appreciation is due to many people who have helped, often without knowing they were doing so, for inspiration, exhortation, and consolation throughout. If many more persons remain unacknowledged, I can only plead in Keatsian Vein:
"Uttered names are sweet..................but those unuttered are sweeter."

(SHIBLI JAMEEL AHMAD)
