ACKNOWLEDGEMENTS

I would first like to thank my mentor Dr. M. K. J. Siddiqui, Director, Council of Science & Technology-Uttar Pradesh, Lucknow (Lien at ITRC) for his constant support, excellent guidance and positive outlook in science and life. He has provided me independence, encouragement, motivation and friendship throughout the course of this work. His time, patience and scientific discussions were an asset to my research and his contribution goes beyond any measurable value.

I am extremely thankful to my co-supervisor Dr. W. A. Siddiqui, Lecturer, Department of Biochemistry, Jamia Hamdard (Hamdard University), New Delhi for his constant inspiration, scientific interest, great insight and guidance throughout my programme.

I would like to express my sincere thank, gratitude and humble appreciation to our medical collaborator Professor Archana Kumar, Department of Paediatrics, King George's Medical University, Lucknow for providing blood samples of children who generously donated their blood for experimental work. Her patience and willingness to always help me will be remembered with sincere gratitude. Without her support this research project would have been difficult to complete.

I extend many thanks to Dr. J.R. Behari for his kind support, valuable help and suggestions throughout my tenure in this program.

Also, great thanks are extended to Director of the Centre for providing all necessary facilities to carry out my whole dissertation work at ITRC, Lucknow.
I take this opportunity to convey my special thank to Mr. Surendra Singh and Mrs. Poonam Saxena for their technical advice and useful suggestions.

I express my sincere thank to Dr. Neeraj Mathur for his assistance in statistical analysis.

I would also like to thank the staff of instrumentation and chemicals for their cooperation.

I would like to thank our Analytical Toxicology buddies Mr. Vipul K. Singh, Mrs. Madhu Anand and Ms. Jyoti who helped me in many ways to complete my dissertation.

My great appreciations to Council of Scientific and Industrial Research, New Delhi for supporting my graduate work thorough Fellowship Program and supporting this investigation at Analytical Toxicology Division, ITRC, Lucknow.

Especially I would like to thank my dearest friends Reyaz, Hifzur, Subhash, Hasnain, Neeraj, Mahendra, Harish, Aqeel, Sudhanshu, Amarnath, Fareed, Asif, Sandeep and Rizwan for their help in many ways and the phases for all their support and friendship throughout my tenure.

Lastly, I would like to extend great thanks to my Parents, Sisters and Brothers for their constant support, encouragement, faith, confidence and patience which helped me to achieve where I am today. Without their whole hearted love and support, I would not have finished this programme.

(Maqusood Ahamed)
