Acknowledgement

And we shaded you with clouds and sent down on you Al- Manna and Quails (Quran- Surah- Al-bakarah). All praises be to Almighty Allah who is the only creator and cherisher of universe for bestowing me with enough patience and perseverance to complete my work successfully.

First of all I feel privileged to acknowledge founder of the university Late Hakeem Abdul Hameed for his far sighted vision to take up positive steps towards the modern education.

Mere words will hardly suffice the help and appreciation shown by my mentor Dr. M.P. Sharma Reader Department of Botany, Jamia Hamdard. He has always been an inspiration and source of insight. I am thankful to him in particular for the benefit of his insight on critical scientific issues. His supportive guidance helped me in broadening my vision to work with sincerity and dedication.

I feel privilege to show my sense of gratitude towards my co-supervisor Dr. N.A. Munsifi Associate professor/senior scientist MRRC (Mushroom Research and Training Center), Division of Plant Pathology SKUAST-K, Shalimar. He helped me to inculcate patience and enthusiasm towards the work that is highly cherished.

I respectfully thank, Dr. Muhammad Iqbal, Head Department of Botany, Jamia Hamdard for providing necessary facilities during the course of my work to carry it effectively.

I feel pride in expressing my deep sense of gratitude to Professor S. K. Jain, Dean Science faculty, Jamia Hamdard for providing me necessary facilities to complete this work successfully.

I am much indebted for warm hospitality and selfless suggestions by teachers Dr. Mahmooduzaffar, Dr. Javed Ahmed, Dr. T.O. Siddiqi, Dr. A.Mujih, Dr. Shahid Umer and Dr. Aftaf Ahmad.

I am highly obliged to express my gratitude to Dr. G.S. Qazi, Director Regional Research Laboratory JSK, Council of scientific and Industrial Research (CSIR) and Dr. A.S. Qawal, Head RRL, Srinagar, (CSIR) for providing me laboratory and transport facility to make this work worth presentable.

I am indebted to Dr. T. N. Kaul former Deputy Director and Head Regional Research Laboratory, Jammu and Kashmir, Srinagar (CSIR) for his suggestions and help he provided for compiling my work, I am also thankful to Dr. P. N Chaudhary for his kind guidance.

I am highly delighted by serious concern shown by Mr. A.M Chesti and Mr. Nasir Ali. The help and support provided by Late Mr. F.A. Khan and Late Mr. Zargar is worth mentioning for escorting me to the places of study and guiding me on each step. I Pray to God for the peace of their souls in the heaven.

Words fall short to express thanks to Dr. Intiyaz Murtaza Assist. Prof., Biochemistry Department, Division of Post Harvest Technology, SKUAST-K, Shalimar, Srinagar for his kind supervision and Dr. Fiza Assist. Prof. Division of Pomology, SKUAST-K, Shalimar, Srinagar for his support.

I sincerely thank, Mr. Iqbal for his helpful and encouraging company. Thans a lot to Mrs. Lia Fatima, Mr. Shamim, Mr. S.O. Sharma, Mr. Shahab, Mrs. Rounji, and Ms. Tabassum for their timely help at library, CFF (central instrumentation facility) and computer section in RRL Srinagar and Jamia Hamdard.
I appreciate the help and advice offered by Dr. Tanwana Jahan, Dr. Taj, Mr. Anand Mohan, Dr. Sajid, Dr. Imeyat, Dr. Areesha, Dr. Alka, Dr. Deepshikha and Dr. Ishrat. Special thanks to Dr. Irfan for his timely help and support.

I am highly obliged to mention Mushroomexpert.com for their help in identifying the mushrooms and Mushrorld.com for encouraging me to move ahead with the broader prospects of the said research.

I owe my research to my parents and family members for being my strength and source of inspiration. The extensive field sampling of this work could never have been completed without the help and courage of my Father, Mother, Brother, Sister and Bhabhi. They deserve special thanks for their ideas, discipline, constant encouragement and counseling which will go along and help to mould my life ahead.

Selfless help and assistance provided by ‘Uncle and my cousins (Shahid, Mudassir, Rumaisa, Salik, Rukhama and Shahnai) and all other relatives including Urfi, Arshad Bhaiya, Khan sahib would be remembered ever after.

I cannot forget the real shape given to my thesis by my sister who did not fail to summarize it to a sweet inspirational poem, which lifted all the fatigue of these years and made me feel that this is just a beginning.

Insight and cooperation by my associates and colleagues were invaluable to understand the context of my work. I express my thanks to Ms. Nousheen, Ms. Zohra Fatima, Dr. Junaid Asham, Dr. Nasar, Mr. Salik, Mr. Naseem, Mr. Sameer, Mr. Afzal, Ms. Anjana, Ms. Nidhi, Ms. Iram, Mr. Kanchan, Ms. Fouzia, Ms. Swariya, Mr. Amandeep, Ms. Humaira, Ms. Shahazia, Mr. Mushtaq, Mr. Arif and Mr. Shafiq.

Timely encouragement provided by my best friend will be remembered till the end and finally it is difficult to express in words the help provided to me by my friends, Dr. Mukhtar Ahmad, Dr. Tabassum Qadir, Ms. Aasiya Hanif, Ms. Sabrien. They will be remembered for giving me time and providing accommodation and peace to write. Least I can do for them is pray to God for their success.

I will remember the support and prayers from my friends especially Ms. Setareh, Ms. Anjum, Ms. Humaira, Ms. Shabeen and Ms. Masarat. It is my privilege to mention Ms. Jundi for her support.

Help and assistance provided by Mr. Imran, Mr. Zakir, Mr. Hafizuddin Mr. Saleem, Mr. Wahid, Mr. Abdul, Mr. Noor Mohammad, Mr. Irfan, Mr. Fazay, Mr. Ahmad, and Mr. Shaik is highly appreciated.

At last without the help of the inhabitants like Ms. Rumaisa, Mr. Ahsan, Mr. Ganai, Mr. Khalid & Mr. Manqool the research could not have been a success for their escorting me in their respective areas and remaining my guides to the far-flung places, which were beyond my reach.

The Mushroom World

World by a mushroom Scenery
   Of fairy rings, molds, truffles n oysters
Telling a story of hidden kingdom that is free,
   Spread diversely, still facing Biological racism n fears
Regarded as the Guardians of future
   And smart fungi of this world, find....
Scarcey somebody to nurture
   Thus, scores remain their.... behind
These keystone species for recuperation
   Of nature are Wide in forests and meadows
Maintain the eco- balance by creation
   Of new life from dead decaying shadows
For them, His prophesy quoted....
   .... Jannah laughed mushrooms came out
And for the dearest unmalt to be benefited
He Sent down Al-Manna and Quails throughout
Staying as a link between plants and animals
   Replenishes the floor by their riches
In a way creating numerous ruling
   On the track, of our soils and ditches
Its efficacy and importance in thus, a fact
   And a field studied vast, them yet to be explored
She herself has reached the hooks to act
   Seen the moments when she was on heights and slopes
The grasslands or the forests, the highlands or other highlands
   Of the valley inhabitates the numerous n valuable treasures
Which could bring relief and economy to thousands
   Because of their edible and medicinal features
Time n tide has asked number of queries
   Related to the politics and greatness of research and nature
Which often has become a debate for worries
   But thanks to HIM for she has succeeded in making it her future
Taking it as a challenge she has made it to the top
   As her name ‘Refit’ signifies the same
Much she owes to the family whom she made to hop
   And crawl in tougher times to Insallah succeed and get the fame
Our wishes are with you for you will remember the state
   And pray for your parents, acknowledge your guides
Who kind heartedly with patience followed your pace and rate
   And they know to secure the nature by rules.... u will abide

With regards
Rahena
