## CONTENTS

### PART A  Synthesis and applications of Spin-labeled Oligonucleotides

1  Synthesis of Oligonucleotides and Spin-labeling Technique  
1.1 Synthesis of Oligonucleotides  
1.2 Spin-labeling Technique  
2  Synthesis of Nitroxide Spin Labels and Incorporation of Spin-label into Oligonucleotide  
2.1 Abstract  
2.2 Introduction  
2.3 Present work  
2.4 Results and Discussion  
2.5 Experimental  
2.6 Conclusions  
2.7 References  
Spectra

### PART B  Ionic Liquids

3  Recent Developments of Task Specific Ionic Liquids in Organic Synthesis  
3.1 General Introduction  
3.2 Recent Developments in TSILs  
Section I: A basic Ionic Liquid [bmim]3PO4 Catalyzed Michael Reaction of Active methylene Compounds and Conjugated Ketones, Esters and Nitriles  
4  
4.1.1 Abstract  
4.1.2 Introduction  
4.1.3 Present work  
4.1.4 Results and Discussion
Section II: A basic Ionic Liquid [bmim]$_3$PO$_4$ as catalyst and reaction media for Aza-Markovnikov Addition of N-Heterocycles on Vinyl Esters

4.I.5 Experimental
4.I.6 Conclusions
4.I.7 References
Spectra

Section I: A Multifunctional Ionic Liquid for Pd(II) Catalyzed Heck Reaction

5.1.1 Introduction
5.1.2 Present work
5.1.3 Results and Discussion
5.1.4 Experimental
5.1.5 Conclusions
5.1.6 References
Spectra

Section II: Palladium catalyzed Cross Coupling Reaction of Aryl Boronic Acids in [bmim]OH

5.II.1 Abstract
5.II.2 Introduction
Section III: Synthesis of Thiocarbonyl Functionalized Ionic Liquids for Nanoparticle Synthesis

5.III.1 Abstract
5.III.2 Introduction
5.III.3 Present work
5.III.4 Results and Discussion
5.III.5 Experimental
5.III.6 Conclusion
5.III.7 References
Spectra
