Acknowledgements

It would not have been possible to write this doctoral thesis without the help and support of the kind people around me, to only some of whom it is possible to give particular mention here.

I am extremely grateful and indebted to my esteemed research supervisor Dr. Ram Pal Chaudhary, Associate Professor, Department of Chemistry, Sant Longowal Institute of Engineering and technology (SLIET; Deemed University), Longowal for the guidance, constant encouragement and suggestions throughout the tenure of my PhD research activities. His expertise in Organic chemistry and particularly in Heterocyclic Chemistry improved my research skills and prepared me for future challenges.

I am thankful to Director, SLIET and Head of Department (HOD), Chemistry SLIET, Longowal for providing me all possible facilities and support during the thesis work.

I am highly indebted to Dr. B. K. Kanungo, Professor, Chemistry Department, SLIET, Longowal for his support and guidance in carrying out molecular modelling and discussions on computational part of the investigations. I am highly thankful to Dr. A. K. Tripathy, Indian Institute of Integrative Medicine, Jammu and Prof. Indu Pal Kaur, University Institute of Pharmaceutical Sciences, Panjab University, Chandigarh for their help in biological screening of the compounds.

I am highly thankful to Prof. S. Bhattacharya, Banaras Hindu University for X-ray crystallographic studies.

I am also thankful to my colleagues, Ms Deepika Gautam, Ms Nidhi, Ms Garima, Ms Simerpreet Kaur, Mr. Ajay Sharma, Mr. Avtar Singh, Mr. Rohit Singla, Ms Ritu Singla and Dr. Rati Kanta Bera for their kind help and support.

I am greatly indebted to my family for providing constant help, support and their forbearance during the course of PhD work.

I would like to take this opportunity to thank all the persons who have contributed in the different aspects during my PhD work.

Finally, and most profoundly, I would like to bow before the almighty for his blessing and kindness.

(Poonam Gautam)
