List of figures ...............................................................................................(iv-v)

Abstract ........................................................................................................(vi-vii)

1. Introduction ............................................................................................. 1-8
   1.1 Drug resistance
   1.2 Traditional medicinal plants in treatment of diseases
   1.3 Essential oils and their uses
   1.4 Aim and objectives

2. Review of literature ..................................................................................9-32
   2.1 Antibiotics and their mode of actions
   2.2 Drug resistance and mechanism of resistance
   2.3 Importance of traditional medicinal plants
   2.4 Historical uses of essential oils and terpenoids
   2.5 Synergistic effect of medicinal plants and antibiotics
   2.6 Characterization of phytochemicals

3. Materials and methods ........................................................................... 33-44
   3.1 Microbial strains and culture conditions
   3.2 Plant material and extract preparation
   3.3 Antimicrobial assay and phytochemical screening

4. Results .................................................................................................... 55-105
4.1 Processing of plant material and phytochemical screening

4.2 Antimicrobial activity of medicinal plants extracts against *S. aureus* and *E. coli*

4.3 Antibacterial assay of extracts (methanol and petroleum ether) of *Colebrookea oppositifolia* against *S. aureus*

4.4 Antimicrobial assay and functional group detection of solvent fractions observed by sequential fractionation of methanolic extract of *C. oppositifolia*

4.5 Antibacterial and synergistic assay of volatile oil (leaf and inflorescence) of *C. oppositifolia*

4.6 FTIR analysis for function group detection in volatile oils (leaves and inflorescence) of *C. oppositifolia*

4.7 Detection of components of volatile oil of *C. oppositifolia* by gas chromatography mass spectrometry (GC/MS)

4.8 Interaction between volatile oil (leaf and inflorescence) and their combinations with antibiotics by FTIR

4.9 Interaction between volatile oil (leaf and inflorescence) and their antibiotics combinations by HPLC

4.10 Interaction of volatile oil (inflorescence and leaf) and their combinations with antibiotics (erythromycin and amoxicillin) by UV-visible spectrometry

4.11 NMR spectra of combinations of oil (inflorescence and leaf) and antibiotics (erythromycin and amoxicillin) to analyze the structural changes during interactions

4.12 Interactions study of terpenoids of volatile oil (leaf) and their combinations by thin layer chromatography

4.13 Antimicrobial assay of terpenoids carene, caryophyllene, pinene and their synergistic effect with antibiotics against *E. coli* and *S. aureus*

4.14 Interactions study of terpenoids and their combinations with antibiotics through FTIR

4.15 Interactions of combinations of terpenoids with antibiotics by UV-visible spectrophotometer analysis

4.16 Antimicrobial and synergistic assay of combination of δ-carene, α-pinene and caryophyllene against *S. aureus* and *E. coli*

4.17 Synergistic assay of combination of carene and pinene with antibiotics against *S. aureus* and *E. coli*
4.18 Interactions of combination of terpenoids with antibiotics by HPLC analysis
4.19 Analysis of modifications in combination of terpenoids with antibiotics by UV-visible spectrophotometry
4.20 NMR spectral analysis to detect changes in the combinations of terpenoids of oil and antibiotics to elucidate the structural interaction
4.21 NMR spectral analysis to detect changes in the combinations of terpenoids of oil
4.22 In silico interaction between terpenoids and antibiotics

5. Discussion...........................................................................................................106-114
6. Summary and Conclusion......................................................................................115-116
7. References............................................................................................................117-135
8. Appendices (i-ii)................................................................................................136
