ACKNOWLEDGEMENT

At this momentous occasion of completing my dissertation work, I would like to appreciate and cherish the contribution of all those benevolent people with whom I have been blessed to associate. All the data collection, experimental work would have failed to serve their purpose for me if blessing of God would not have joined hands with my efforts.

First of all I praise almighty God who enabled me to complete this work successfully by blessing me with potential to complete my research work. I offer my humblest words of thanks to him. I would like to express my sincere gratitude to my supervisor Dr. Mrs. Pankaj Raizada, Assistant professor, School of chemistry, Shoolini University, Solan, Himachal Pradesh. She steered me through this journey with her invaluable advices, positive criticism, stimulating discussion and consistent encouragement.

I would like to sincerely thank Prof. Sunil Puri, Dean of Faculty and Dr. Deepak Pathania, Head of the Department of Chemistry for their sincere support during entire course of my project work and providing facilities in the department. I extend special words of thanks and gratitude to faculty members of chemistry department Dr. Pardeep Singh, Dr. Amit Kumar and Dr. Kalpna Chauhan for their caring attitude, moral support and everlasting help throughout the course. I am extremely thankful to Mohan Sharma, Anil Kumar, Balvant Singh and Anoop Chauhan, Lab attendants, School of chemistry, Shoolini University, Solan, without whose co-operation it would have been difficult to complete the lab work in time properly.
