List of Tables

Table 2.1 Number of NPOs ---------------------------------37
Table 2.2 Rural–Urban Distribution of NPOs -------------------37
Table 2.3 Distribution of Subsectors (Top 3 Subsectors) ---------38
Table 3.1 Summary of Literature on Different Perspectives on Market Orientation ---------------------47
Table 3.2 Performance Variables Used in Market Orientation - Performance Studies in Nonprofit Sector ---------------------78
Table 3.3 Market Orientation - Performance Research in Nonprofit Sector -----------------------------------86
Table 3.4 Dimensions of Organisational Innovativeness ------------103
Table 5.1 Data Collection Details --------------------------------146
Table 5.2 Kaiser-Meyer-Olkin Measure (KMO) and Bartlett’s Test of Sphericity for Market Orientation (Donors) ------------154
Table 5.3 Factor Loading Matrix - Market Orientation (Donors) ------155
Table 5.4 Reliability - Market Orientation (Donors) ---------------156
Table 5.5 Kaiser-Meyer-Olkin Measure (KMO) and Bartlett’s Test of Sphericity – Market Orientation (Beneficiaries). 157
Table 5.6 Factor Loadings Matrix - Market Orientation (Beneficiaries) ----------------------158
Table 5.7 Reliability - Market Orientation (Beneficiaries) 158
Table 5.8 Reliability – Innovativeness --------------------------------159
Table 5.9 Kaiser-Meyer-Olkin Measure of Sampling Adequacy and Bartlett's Test of Sphericity - Innovativeness 159
Table 5.10 Kaiser-Meyer-Olkin Measure of Sampling Adequacy and Bartlett's Test of Sphericity – Performance 160
Table 5.11 Factor Loadings Matrix - Organisational Performance 161
Table 5.12 Reliability Analysis - Organisational Performance 161
Table 5.13 Descriptive Statistics of the Variables 162
Table 5.14 Z scores for Skewness and Kurtosis 170
Table 6.1 Wilcoxon Signed Ranks Test for Difference in Market Orientation towards Donors and Beneficiaries 172
Table 6.2 Mann-Whitney test – Market Orientation and Source of Funding 173
Table 6.3  Mann-Whitney Test for Market Orientation and Presence of Marketing Department/Personnel ........................................ 174
Table 6.4  Mann-Whitney Test for Market Orientation and Organisational Size ................................................................. 175
Table 6.5  Kruskal Wallis Test for Market Orientation and Financial Resources ............................................................ 175
Table 6.6  Reliability Measures (1st Stage Measurement Level) ........ 184
Table 6.7  Unidimensionality of Measurements Using PCA ............ 185
Table 6.8  Reliability Measures (2nd Stage Measurement Level) ........ 186
Table 6.9  Convergent Validity - AVE Values of Constructs (1st Order Level) ................................................................. 187
Table 6.10 Outer Loadings – t Values – 1st Order Level (Convergent Validity Check at Indicator Level) ........................................ 187
Table 6.11 Convergent Validity - AVE Values of Constructs (2nd Order Level) ................................................................. 188
Table 6.12 Outer Loadings - t values- 2nd order level (Convergent Validity at Indicator Level) .................................................. 188
Table 6.13 Comparison of AVE and Inter-Construct Correlations at 1st stage (Discriminant Validity Check) ............................... 189
Table 6.14 Cross Loadings of Latent Variables at 1st Stage (Discriminant Validity at Indicator Level) ........................................ 191
Table 6.15 Comparison of AVE and Inter-Construct Correlations at 2nd stage (Discriminant Validity) ........................................ 192
Table 6.16 Cross Loadings of Indicators at 2nd Order Level (Discriminant Validity at Indicator Level) ........................................ 193
Table 6.17 Path Significance and t Values (Bootstrapping Results) .. 197
Table 6.18 R-Square Results ................................................................. 197
Table 6.19 Effect Size of Paths (Cohen’s f²) ........................................ 198
Table 6.20 Predictive Value of the Model (Stone-Geisser’s Q²) .......... 199
Table 6.21 Computation of Goodness of Fit ...................................... 199
Table 6.22 Path Coefficients (With Innovativeness) ......................... 201
Table 6.23 Path coefficients (without Innovativeness) ...................... 201
Table 6.24 Model Analysis Summary ................................................ 202
Table 6.25 Correlation Matrix of Latent Variables ............................ 204
Table 6.26 PLS Loadings with Common Method Variance Factor in the Model ................................................................. 205
