Acknowledgement

Research is an inclusive task. To carry out the tedious task of research work the researcher needs guidance, support and motivation of various people. At this moment of my substantial enhancement, I have hardly enough words to express my gratitude towards those who were constantly involved with me during my study work. My sincere thanks to my expert guide Dr. Ushaben K. Kher for giving me a proper guidance, right direction and inspiration to complete this research work. I am also thankful to the Principals of the schools and teachers of schools for their kind co-operation as without their help and permission this work was not possible to implement and be completed. I express my deepest sense of gratitude to those educationists who helped me in construction of the tools for the present study. I am thankful to the librarians and co-coordinators of various libraries and resource centres who facilitated me in getting the source of knowledge. Especially I thank Dr. Kamalnayan Parmar for his valuable assistance in statistical calculation. I thank the young & enthusiastic students of the experimental schools. Without their participation the whole efforts would be in vain. Last but not the least; I am very grateful to my family members, friends and all my well wishers who have directly or indirectly offered their valuable assistance and suggestions during my research work.
