Chapter I  Introduction  

1.1 Sustainable Livelihood: Concepts and Issues 1  
1.2 Evolution of the Sustainable Livelihood Approach 7  
1.3 Literature review 9  
1.4 Objective 28  
1.5 Significance 28  
1.6 Hypothesis 29  
1.7 Methodology 30  
1.7.1 Data sources 35  
1.7.2 Area of the study 36  
1.7.3 Sample Design 37  
1.7.4 District and village/urban profile 37  
1.8 Line of analysis 41  
1.9 Limitations 42  

Chapter II  Livelihood in Assam: The vulnerability 44  

2.0 Trends in livelihood capital 46  
2.1 Financial Capital 46  
2.1.1 Absolute amount of assets 47  
2.1.2 Average value of assets by occupation 47  
2.1.3 Asset distribution by land holding and MPCE 48  
2.1.4 Asset composition 48  
2.1.5 Incidence of Indebtedness and Average amount of Debt 52  
2.1.6 Debt asset ratio 53  
2.2 Human Capital 55  
2.2.1 Health 55  
2.2.1.1 Infant Mortality Rate 56  
2.2.1.2 Morbidity and hospitalisation 56  
2.2.1.3 Treatment from Government sources 57  
2.2.1.4 Loss of household income for hospitalization 58  
2.2.2 Nutrition and adequacy of food 58  
2.2.2.1 Per capita intake of calorie, protein and fat 60  
2.2.2.2 Calorie intake in relation to ‘norm’ 62  
2.2.2.3 Per capita per diem intake of calorie, protein and fat by MPCE class 63
2.2.2.4 Calorie intake from different food group 64
2.2.2.5 Meals taken at home 66
2.2.2.6 Food adequacy and availability status by household type 66
2.3 Physical capital 67
2.3.1 Sources of drinking water 68
2.3.2 Type of latrine 69
2.3.3 Dwelling unit 70
2.3.4 Uses of energy for cooking and lighting 71
2.0.0 Shocks 73
2.0.1 Flood 74
2.0.2 Violence against women 76

Chapter III Livelihood Capital 79

3.1 Financial capital 79
3.1.1 Average value of assets in absolute terms 80
3.1.2 Percentage distribution of households by household asset holding 80
3.1.3 Average value of assets by occupation and MPCE 81
3.1.4 Composition of asset items 82
3.1.5 Debt - Asset ratio 83
3.2 Physical capital 84
3.2.1 Drinking water 84
3.2.1.1 Sources and sufficiency of drinking water 84
3.2.1.2 Quality of drinking water 86
3.2.1.3 Personal hygiene in relation to water 87
3.2.2 Dwelling unit 89
3.2.3 Sanitation & hygiene 89
3.2.3.1 Percentage of latrines and bathroom and type of latrine 89
3.2.3.2 Garbage and drainage 90
3.2.3.3 Problem of flies, mosquitoes and foul odour and change in the intensity of the problem 91
3.2.4 Energy 92
3.2.4.1 Sources of energy used for cooking and lighting 92
3.2.4.2 Sources of energy by household type 92
3.3 Human Capital 93
3.3.1 Health 94
3.3.1.1 Morbidity, Infant Mortality Rate & immunization of children 94
3.3.1.2 Treatment of ailments 95
3.3.1.3 Medical and other related expenditure 97
3.3.2 Nutrition 100
3.3.2.1 Per capita per diem intake of calorie, protein and fat 100
3.3.2.2 Intake of food items 101
3.3.2.3 Meals taken free and by payment 103
3.3.2.4 Food adequacy 104
Chapter IV Livelihood Strategies 108

4.1.1 Livelihood strategy: An overview 110
4.2 Livelihood strategy: Survey findings 115
4.2.1 Livelihood activities in the district of Nagaon 116
4.2.1.1 Village: Pachim Salpara 116
4.2.1.2 Village: Chakori Gaon 118
4.2.1.3 Village: Koach Gaon 121
4.2.1.4 Village: Bhakatgaon 123
4.2.1.5 Village: Kalapani (Buridua) 125
4.2.1.6 Town: Nagaon 126
4.2.2 Livelihood activities in the district of Kamrup: 127
4.2.2.1 Village: Ganakpara 127
4.2.2.2 Village: Dhopguri 129
4.2.2.3 Guwahati city 131

Chapter V Livelihood outcome 139

5.0 Assessment of livelihood outcome 139
5.1 Primary data analysis 139
5.1.1 Principal Component Analysis 140
5.1.2 Percentage and Graphical analysis 143
5.1.3 Qualitative Analysis 150
5.2 Secondary data Analysis 160
5.2.1 Comparative analysis of livelihoods in rural and urban 161
      Assam
5.2.2 Comparative analysis of sustainability between Assam and 163
      India
5.0.0 Testing of the hypothesis 169

Summary 174
Conclusion 184
Suggestions 186
Bibliography 189
Annexure A A-1
Annexure B B-1 to B-10
Annexure C C-1 to C13
Annexure D D-1 to D-5
Annexure E E-1
Annexure F F-1
Annexure G G-1
Annexure H H-1
Annexure I I-1
Annexure J J-1 to J-6
