ACKNOWLEDGEMENT

An acknowledgement is usually taken as a ritual with which a thesis or any academic work opens. The magnificent splendid and wonderful shape was formed to my present work, due to different people notions, guidance and blessings. My entire efforts and hours spent in laboratory as well as the library for last four years are materialized into this thesis.

The lion's share of my heartfelt everlasting gratitude and respect goes to my guide Prof. J.T. Rao for his persistent interest, encouragement, vigilant supervision, help and importantly, exacting and demanding excellence .......

I hasten to register my note of sincere thanks to Prof. V.K. Saxena, Head, department of chemistry, for providing laboratory facilities and significant cooperation in all respects.

I am grateful to the Director, CDRI Lucknow for recording NMR spectra. I wish to place on record my acknowledgements to Prof. A.R. Parikh, Head, department of chemistry, Saurashtra University, Rajkot, for his kind co-operation to provide IR spectra. I am grateful to Archana Mehta, Mrs. Sindhu, department of botany and Mr. Sunil Gupta, department of zoology who has taken much pain in helping me to carry the biological studies.

I am immensely indebted and heartfelt gratitude to my friends K.S. Raju, scientist and Thomas, research associate, IISS, Bhopal who encouraged me in carrying out this work. I express my sincere thanks to my co-researchers Rahul, Vivek, Manish and Srinivas for their keen and continued interest, periodic discussions and encouragement.

I would like to place on record the long standing and never ending sense of gratitude towards Mrs. J.T. Rao for her constant love and affection.

Finally I am immensely indebted and heartful gratitude goes to my sister, brother and my grand parents for their encouragement and cooperation and everlasting support throughout my work. The moral guidance and blessings, I received from my mother and father can’t be expressed in words. I shall remain grateful to them for ever.

(M.P.P. Raj)
