ACKNOWLEDGMENT

And my success in my task can only come from Allah

In Him I trust and unto Him I turn

I feel myself most fortunate to have a highly imaginative, enterprising and accommodative research guide in Dr. Mahmooduzzafar, a man of diverse expertise, who provided me invaluable suggestions drawn from his extensive knowledge of the field. I may gleefully accept that without understanding and continuous encouragement of Dr. Mahmooduzzafar, who assisted me much beyond his domain. I would have never been able to make even a dent on the subject matter. I can only say that without his careful and critical review, the thesis in its present form would have been less illuminating, far less accurate, less readable and (perhaps worst of all) even longer than this; thank you Sir.

I am beholden to Prof. M. Iqbal, Head, Department of Botany, who was always available to help me with utmost care and attentive academic approach to tide over the hurdles. His constant indulgence was a source of encouragement in pursuit of my research objectives. He has provided me each and every facilities whenever I needed during the course of investigation.
