ACKNOWLEDGEMENT

The most grateful acknowledgement is expressed by me to my supervisor Dr. Rakeshkumar G. Rao for his kind co-operation and competent guidance. Completion of my work is due to the guidance, inspiration and encouragement received from him. His generous help and valuable suggestions are essential for the completion of the present work. I confess acknowledgement to Prof. G.S. Rao who devoted his valuable time to go through the thesis and endeavoured to make it as accurate as possible.

I am very much thankful to my teachers whose teachings inspired me a lot and without whose hard work I might have not reached at this stage.

I am also thankful to my colleagues, friends and all those who directly and indirectly helped me in completing my research work. I acknowledge indebtedness of the genius of those who provided guidance through their works. I heartily confess gratitude to them who knowingly or unknowingly have been participant in accomplishing the work.

Last but not the least; I take this opportunity to record my deep sense of gratitude to my family members for their sympathy, co-operation and encouragement throughout the study, without which this desire would not have been fulfilled.

Rajendra D. Suthar
