LIST OF TABLES

Table 3.1 : Table showing awareness of employee regarding Biometric Processes................................................................. 80
Table 3.2 : Table showing Source of Information about Biometrics................. 83
Table 3.3 : Table showing basis of Observation of Attendance Records......... 85
Table 3.4 : Table showing Opinion of employee about the present approach used by the organization........................................ 88
Table 3.5 : Table showing employees readiness towards change in the above approach............................................................................... 91
Table 3.6 : Table showing awareness of employee regarding information software used in the organization.................................................... 94
Table 3.7 : Table showing methods of security of data and employees details......................................................................................... 97
Table 3.8 : Table showing views about the proper identification system reduces absenteeism................................................................. 100
Table 3.9 : Table showing maintenance of database by the organization................................................................. 102
Table 3.10 : Table showing database security approach followed in the organization............................................................................... 104
Table 3.11 : Table showing availability of IT department in any organization......................................................................................... 106
Table 3.12 : Table showing existence of computer network in organizations........ 109
Table 3.13 : Table showing type of Computer Network in organizations........ 111
Table 3.14 : Table showing if protection of data is in secured way or not............ 114
Table 3.15 : Table showing views of the employees on use of a proper security system to save the data from getting hacked or misused if you feel data is not secured in a proper way........................................... 116
Table 3.16 : Table showing employees views about the proper security system in the organization increases data security and in turn efficiency and productivity of the organization...................................................... 119

Table 3.17 : Table showing if attendance is recorded in a secured way and no breach of security is done................................................................. 120

Table 3.18 : Table showing need of new security system in any organization................................................................. 122

Table 3.19 : Table showing readiness for change................................................................. 124

Table 3.20 : Table showing acceptance of new system by employees................................. 125

Table 3.21 : Table showing budget for new technology................................................................. 127

Table 3.22 : Table showing personal advantages to the employees experienced by organization information system.................................................. 130

Table 4.1 : Table showing readiness for change................................................................. 138

Table 4.1.1 : Table showing opinion of males and females for Table 4.1 ........................................... 139

Table 4.1.2 : Table for Chi Square calculation for Table 4.1.1.................................................. 139

Table 4.2 : Table showing views of the employees on use of a proper security system to save the data from getting hacked or misused if you feel data is not secured in a proper way......................................................... 141

Table 4.2.1 : Table showing opinion of males and females for Table 4.2 ........................................... 142

Table 4.2.2 : Table for Chi Square calculation for Table 4.2.1.................................................. 142

Table 4.3 : Table showing employees views about the proper security system in the organization increases data security and in turn efficiency and productivity of the organization..................................................... 144

Table 4.3.1 : Table showing opinion of males and females for Table 4.3 ........................................... 145

Table 4.3.2 : Table for Chi Square calculation for Table 4.3.2.................................................. 145

Table 4.4 : Table showing views about the proper identification system reduces absenteeism.................................................................................................. 147

Table 4.4.1 : Table showing opinion of males and females for Table 4.4 ........................................... 148

Table 4.4.2 : Table for Chi Square calculation for Table 4.4.1.................................................. 148
