AKNOWLEDGEMENT

At this momentous occasion of completing my dissertation work I would like to appreciate and cherish the contribution of all those benevolent people with whom I have been blessed to associate. All the data collection, experimental work would have failed to serve their purpose for me if blessing of God would not have joined hands with my efforts.

First of all I praise almighty God who enables me to complete this work successfully by blessing me with potential to complete my research work. I offer my humblest words of thanks to Him. I would like to express my sincere gratitude to my supervisor Dr. Sunil Kumar, Assistant professor, School of chemistry, Shoolini University, Solan, Himachal Pradesh. He steered me through this journey with his invaluable advices, positive criticism, stimulating discussion and consistent encouragement. I am also thankful to Mr. Amit Kumar, Assistant professor, School of chemistry, Shoolini University, who guided me frequently and helped me a lot by providing valuable knowledge during my study period. I would like to sincere thanks to Mohan Sharma, Anil Kumar and Balwant Singh Lab attendants, School of chemistry, Shoolini University without whose co-operation it would have been difficult to complete the lab work in time properly.

I would like to express my love, respect and deepest admiration to my family for their unconditional love, encouragement, understanding and dedication throughout the work and the support to reach this position in my life. I express my deepest gratitude toward my mother and father for the care and constant encouragement for their excellent moral support and my brothers who have been a constant source of love, concern, support and strength all the time.

I am thankful to all the research scholars in department of chemistry for their constant encouragement in completing this research work. I would also like to convey thanks to all my friends Apoorva, Jyoti, Sumati, Ripu Daman Singh and Ankit for their words of encouragement.

SUSHMA DEVI
