ACKNOWLEDGEMENT

First, I thank the Lord Almighty for giving me Wisdom, Knowledge and Faith to complete my research work completely.

My heart is full of reverence for my guide Dr. D. SARALA THAMBAVANI, Associate Professor in Chemistry, Sri Meenakshi Government College for Women, Madurai-625002. Her teachings have not only enriched the standard of this thesis but also shaped my personality and put my mind poised in eco conscious life style which is the need of this polluted world. In the course of preparing the thesis, her erudite scholarship and intellectual scrutiny over my work actually extended the frontiers of my knowledge in the field of Chemistry. Her questions and arguments made me read more books on the concerned subject and made my research work more comprehensive. But for her, thesis would not achieved this much completeness. In short, I am intellectually elevated in the scientific realm by her.

With pleasure I express my gratitude to Dr.G.GANESAN, The Director, Research and Development Centre, Bharathiar University and Dr.K.RAJENDRA PRASAD, Professor, Head of the Department of Chemistry, for their prime role to uplift me.

I extend my sincere thanks to the CHAIRPERSON, DIRECTORS, PRINCIPAL and Head of the Department of Chemistry, PSNA College of Engineering Technology, Dindigul - 624622 for their kind and encouraging words that enhanced my confidence levels and morally supported me during the course of research work.

I express my deep sense of gratitude to the research scholars and my friends for their constant help in completing my research work.

Last but not least, I thank profusely My Son, Parents, in-laws, all the family members for their support and encouragement, especially to my Husband who broken away all the hurdles and dissent and helped me to complete the thesis.

PRATHIPA V
