ACKNOWLEDGEMENTS

I would never have been able to finish my dissertation without the help of many persons and support from my family members and it is difficult to mention here all of them for want of space. However, I sincerely acknowledge every one of them.

First and foremost, I express sincere gratitude to my supervisor, Dr. N. Dharmaraj, Associate Professor, Department of Chemistry, Bharathiar University, Coimbatore, who has supported me throughout the thesis work with his patience and knowledge whilst allowing the room to work on my own way and providing with an excellent atmosphere for doing research. A person with an amicable and positive disposition, Sir has always made himself available to clarify my doubts despite his busy schedules and I consider it as a great opportunity to do my doctoral programme under his guidance and to learn from his research expertise.

I record my sincere gratefulness to the authorities of Bharathiar University, Coimbatore, for the award of University Research Fellowship (URF) and the infrastructural facilities provided to perform the required research activities.

I would like to express my deep gratitude and respect to Prof. Dr. K. Natarajan, Emeritus Scientist (CSIR), Department of Chemistry, Bharathiar University, Coimbatore, whose advices and insight was invaluable to me. For all, I learned from him and for providing the vision for the experiments. His attitude towards research inspired me to pursue Ph.D program in his field of specialization.

My sincere thanks to Prof. K.J. Rajendra Prasad, Head, Department of Chemistry, Bharathiar University, Coimbatore and other faculties, Prof. S.P. Rajendran, Prof. S. Govindarajan, Prof. P.S. Mohan, Dr. R. Prabhakaran, and technical staff members, Dr. M.V. Kaveri and Mrs. S. Kavitha, Department of Chemistry, Bharathiar University, Coimbatore, for their encouragement and support.

Most of the results described in this thesis would not have been obtained without a close collaboration with few laboratories around the world. I owe a great deal of appreciation and gratitude to Dr. Nattamai S.P. Bhuvanesh, Department of Chemistry, Texas A&M University, United States of America, and Prof. Alan H. Cowley, Department of Chemistry and Biochemistry, his student Rachael R Butorac, University
of Texas at Austin, United States of America for their help and collaboration to solve single crystal X-ray structures.

I thank the authorities of KMCH College of Pharmacy, Coimbatore, India, and Dr. R. Ramadasan kuttan, Research Director, Amala cancer research centre, Thrissur, Kerala, India, who helped to conduct biological investigation for some my samples. I am grateful to Prof. R. Ramu, and Prof. K. Pitchumani, School of Chemistry, Madurai Kamaraj University, Madurai, India, for their help in recording circular dichroism spectral measurements. I also thank Dr. P.V.L. Rao, Director, DRDO-BU CLS, Dr. K. Kadirvelu, Joint Director, DRDO-BU CLS, Dr. J. Angayarkanni and Dr. V. Vijaya Padma Faculty members, Department of Biotechnology, Bharathiar University, Coimbatore, India, for some instrumental facilities.

My greatest appreciation goes to my best friend, Mr. P. Emayavaramban, who was always with me and extended a great support in all my struggles and frustrations in my new life and studies.

I feel lucky to have my dearest seniors, Dr. P. Krishnamoorthy, Dr. P. Sathayadevi, Dr. D. Senthil Raja and Dr. E. Ramachandran who cared so much about me and my work as well as responded to my questions and queries. I cannot finish my thesis so soon without their support, kind assistance and encouragement.

I would like to thank my colleagues in our laboratory Mr. D. Selvakumar, Dr. N. Neelakandeswari, Dr. G. Sangami, Mrs. E. Jayanthi, Mr. A. Vignesh and Ms. M. Anusuya whose association perpetually refreshed, memorable and gave a pleasant time while working with them.

I simply fumble for words to express my heavy debts of gratitude Dr. R. Karvembu, Head, Department of Chemistry, National Institute of Technology, Tiruchirappalli, India, Dr. R. Ramesh, Professor, Department of Chemistry, Bharathidasan University, Tiruchirappalli, India, Dr. S. Abraham John and Dr. K.P. Elango, Department of Chemistry, Gandhigram Rural Institute, Dindigul, India, Dr. K. Paneerselvam, Professor, Department of Bioinformatics, Karunya University, Coimbatore, India, Mrs. M. Chitra Dharmaraj and Ms. D. Sadhana, for their help in all possible dimensions through which I came up to this stage.
The thesis would not have been as what it is now without the help from Mr. K. Kanagaraj, Dr. N. Vasimalai, Mr. K.G. Kiran, Dr. S. Ganes Babu, Mr. K. Chandra prakash, Dr. N. Loganayagi, Dr. M. Sankaran, Ms. S. Mathusalini, Dr. C. Uvarani, Mrs. T. Indumathi, Ms. P. Kalaiselvi, Dr. Y.L. Balachandran, Dr. R. Rony Antony, Mr. G. Arun kumar, Mr. K. Navamani and Mr. A. Murugesh, Research Scholars of various Departments of Bharathiar University as well as other Universities.

I would also like to thank my parents and sisters. They always extent their support and encourage me with their unlimited care, love, affection and wishes.

Above all, I owe it to the “Almighty God” who is offering me the wisdom, health and strength to undertake this research task and guiding me to the successful completion of my Ph.D. thesis.

M. Alagesan
