# CONTENTS

1. **INTRODUCTION** 01
   - 1.1 Pharmacognostical studies 18
   - 1.2 Phytochemical investigations 19
   - 1.3 Molecular studies 21
   - 1.4 *In vitro* Pharmacological studies 23

2. **REVIEW OF LITERATURE** 25
   - 2.1 Pharmacognostical studies 26
   - 2.2 Phytochemical studies 30
   - 2.3 Molecular studies 41
     - 2.3.1 DNA Barcoding 41
     - 2.3.2 RAPD Analysis 45
   - 2.4 Pharmacological studies 48
     - 2.4.1 *In vitro* Cytotoxic Potential 58

3. **MATERIALS AND METHODS** 64
   - 3.1 Collection of Materials 64
   - 3.2 Pharmacognostical studies 64
     - 3.2.1 Plant Materials for Micro-morphological studies 64
     - 3.2.2 Epidermal studies 64
     - 3.2.3 Fixatives for Anatomical studies 65
     - 3.2.4 Stains and Reagents for Anatomical studies 65
     - 3.2.5 Stains/Chemicals for Histochemical studies 65
     - 3.2.6 Histochemical studies 66
     - 3.2.7 Materials for SEM studies 67
   - 3.3 Phytochemical studies 67
     - 3.3.1 Successive solvent extraction 67
     - 3.3.2 Preparation of Petroleum ether extract 68
     - 3.3.3 Preparation of Chloroform extract 68
     - 3.3.4 Preparation of Methanol extract 69
3.3.5 Preparation of crude methanol extract 69
3.3.6 Thin Layer Chromatography 69
3.3.7 Determination of Total Phenolics and Flavonoids 70
  3.3.7.1 Extraction 70
  3.3.7.2 Total Phenolic assay 70
  3.3.7.3 Total Flavonoid assay 71
3.3.8 Determination of Total Alkaloids 71
  3.3.8.1 Extraction 71
  3.3.8.2 Preparation of the solutions 72
  3.3.8.3 Preparation of standard curve 72
3.4 Molecular studies 73
  3.4.1 Plant material 73
  3.4.2 DNA Barcoding 73
    3.4.2.1 Genomic DNA extraction 73
    3.4.2.2 Quality and Quantity analysis of DNA 75
    3.4.2.3 Polymerase Chain Reaction 76
    3.4.2.4 Details of primers used for PCR 77
    3.4.2.5 Analysis of DNA amplification by AGE 78
      3.4.2.5.1 Standard DNA markers 78
      3.4.2.5.2 PCR-Product electrophoresis 78
    3.4.2.6 Purification and DNA sequencing 78
    3.4.2.7 Sequencing of purified rbcL gene segment 79
    3.4.2.8 rbcL sequence analysis 79
  3.4.3 Random Amplified Polymorphic DNA 79
    3.4.3.1 Agarose gel electrophoresis 81
    3.4.3.2 Visualization of PCR products 82
    3.4.3.3 Data analysis 82
    3.4.3.4 Buffers and stock preparation for RAPD 83
3.5 Anti-acetylcholinesterase activity 84
  3.5.1 Preparation of plant extract 84
3.5.2 Chemicals 84
3.5.3 Reagents 84
3.5.4 Anti-acetylcholinesterase activity 86

3.6 *In vitro* cytotoxicity studies 86
3.6.1 Preparation of the plant extract 86
3.6.2 Cytotoxicity assay 87
3.6.3 Material required 88
3.6.4 Procedure 88

4. RESULTS 89
4.1 Morphological description 89
   4.1.1 *Justicia adhatoda* L. 89
   4.1.2 *Justicia beddomei* (Clarke) Bennet 90
   4.1.3 *Justicia betonica* L. 91
   4.1.4 *Justicia gendarussa* Burm F. 92
   4.1.5 *Justicia santapau* Bennet 93
   4.1.6 *Justicia wynaadensis* (Nees) Heyne Ex Anders 94
4.2 Pharmacognostical studies 95
   4.2.1 Microscopic investigations 96
      4.2.1.1 Anatomical studies 96
      4.2.1.2 Histochemical studies of the roots 100
   4.2.2 Scanning Electron Microscopic studies 101
4.3 Phytochemical studies 101
   4.3.1 Thin Layer Chromatographic studies 101
   4.3.2 Total Phenolics and Flavonoids 102
   4.3.3 Total Alkaloids 104
4.4 Molecular Studies 104
   4.4.1 DNA Barcoding 106
   4.4.2 RAPD Analysis 108
4.5 Pharmacological investigations
  4.5.1 Anti-AChE activity
  4.5.2 In vitro cytotoxicity studies

5. DISCUSSION
  5.1 Morphological characters
  5.2 Pharmacognostical studies
    5.2.1 Scanning Electron Microscopic studies
  5.3 Phytochemical studies
    5.3.1 Thin Layer Chromatography
    5.3.2 Total Phenolics and Flavonoids
    5.3.3 Total Alkaloids
  5.4 Molecular studies
    5.4.1 DNA Barcoding
    5.4.2 RAPD Analysis
  5.5 Pharmacological investigations
    5.5.1 Anti-AChE activity
    5.5.2 In vitro cytotoxicity studies

6. SUMMARY
  6.1 Pharmacognostical investigations
  6.2 Phytochemical screening
  6.3 Molecular studies
  6.4 In vitro Pharmacological investigations
