# CONTENTS

## CHAPTER-1 INTRODUCTION

1.1 Plasma Waves  
1.2 Instabilities in Plasma  
1.3 Multi-Species Plasma  
1.4 Studies Made in This Thesis  
References

## CHAPTER-2 PARAMETRIC DECAY OF A WHISTLER WAVE AT THE DIFFERENCE FREQUENCY OF TWO ELECTROMAGNETIC WAVES IN A MULTI-SPECIES PLASMA

2.1 Introduction  
2.2 Mathematical Analysis  
2.3 Lower-Hybrid Wave Equation  
2.4 Ion-Bernstein Wave Equation  
2.5 The Dispersion Relation For the Decay Instability  
2.6 Results and Discussions  
References
CHAPTER-3 :PART-A:

STIMULATED BRILLOUIN SCATTERING OF AN ELECTROMAGNETIC WAVE BY AN ACOUSTIC-LIKE MODE IN A MULTI-ION SPECIES PLASMA

3.1A Introduction
3.2A Instability Analysis
3.3A Nonlinear Growth Rate
3.4A Results and Discussions

References

:PART-B:

CURRENT DRIVEN INSTABILITY OF AN ACOUSTIC-LIKE MODE IN A MAGNETIZED TWO-ION SPECIES PLASMA

3.1B Introduction
3.2B Dispersion Relation and Growth Rate
3.3B Discussions

References

CHAPTER-4

GENERATION OF ELECTROMAGNETIC WAVE AT THE UPPER-HYBRID MODE CONVERSION LAYER IN TWO-ELECTRON TEMPERATURE PLASMAS

4.1 Introduction
4.2 Mathematical Formalism
4.2.1 Parametric Decay process
4.2.2 Basic Equation
4.2.3 Wave Equation For High Frequency Radiation
4.2.4 Low Frequency Wave Equation
4.2.5 Nonlinear Coupling
4.3 Electromagnetic Oscillating Two-Stream Instability
4.4 Stability Analysis and Growth Rates.
4.5 Results and Discussions
References

CHAPTER-5
FILAMENTATION INSTABILITY NEAR THE LOWER HYBRID WAVE FREQUENCY IN A TWO-ELECTRON TEMPERATURE MAGNETO-PHASEMA
5.1 Introduction
5.2 Mathematical Formation
5.3 Basic Equations
5.4 Wave Equations
5.5 Nonlinear Dispersion Relation
5.6 Stability Analysis And Growth Rate
5.7 Results And Discussions
References

CHAPTER-6
EXCITATION OF ION-ION HYBRID MODE BY BEAM-PLASMA INTERACTION
6.1 Introduction
6.2 Beam Response
6.3 Plasma Response
6.4 Dispersion Relation and Growth Rate
6.5 Results And Discussions
References
