CONTENTS

ACKNOWLEDGEMENT  (i)
PREFACE  (ii)
CONTENTS  (iv)

CHAPTER - I  BASIC FEATURES OF RARE-EARTH AND TRANSITION ELEMENTS  1-23
1.1 Introduction  1
1.2 Basic features of rare-earth elements  4
1.3 Rare-earth compounds  10
1.4 Basic features of transition elements  16
1.5 Basic features of platinum group elements  17
1.5.1 Uses and Importance  20

CHAPTER - II  BASIC THEORIES OF MAGNETISM, DIELECTRIC AND ELECTRICAL TRANSPORT IN SOLIDS  24-82
2.1 Introduction  24
2.2 Magnetic properties of solids  24
2.3 Paramagnetism of non-interacting magnetic ions  26
2.4 Effect of dipolar interaction and crystal field  29
2.5 Molecular field models for ordered magnetic materials  30
2.5.1 Weiss theory of ferromagnetism  32
2.5.2 Neel’s theory of antiferromagnetism  35
2.5.3 Neels’ theory of ferrimagnetism  37
2.5.4 Other types of ordering in ferrimagnetic material  43
2.6 Different types of exchange interactions  43
4.4 Structure of the studied materials 126
4.5 Thermal studies of the prepared materials 124
4.6 Preparation of pellets with uniform density 133
4.7 Cleaning polishing and electrode making 135
4.8 Conclusions 136

CHAPTER - V  ELECTRICAL CONDUCTIVITY OF TUNGSTATE COMPOUNDS AT HIGH TEMPERATURE  137-159
5.1 Introduction 137
5.2 Material preparation and experimental procedure 138
5.3 Study of pellet density and electrical conductivity as a function of pelletizing pressure 139
5.4 Study of current density as a function of applied electric field 142
5.5 Study of electrical conductivity as a function of frequency and time 145
5.6 Study of ac electrical conductivity as a function of temperature 148
5.7 Discussion 157
5.8 Conclusion 159

CHAPTER - VI  DIELECTRIC PROPERTIES OF TUNGSTATE COMPOUNDS  160-174
6.1 Introduction 160
6.2 Material preparation and experimental technique 161
6.3 Dielectric constant and loss studies 161
6.4 Conclusion 173

CHAPTER - VII  MAGNETIC SUSCEPTIBILITY OF TUNGSTATE COMPOUNDS AT HIGH
