List of Tables:

Table 1.1: Number of CuO$_2$ planes and critical temperature of some HTS compounds. 14
Table 1.2: Critical parameters of YBCO, Bi-2212 and Bi-2223 HTS. 15
Table 2.1: Twenty five Roots of $H J_0(ab) = \alpha J_1(ab)$ 55
Table 3.1: Properties of AMSC make YBCO tape. 79
Table 3.2: Parameters of YBCO tape considered for FEA analysis. 83
Table 3.3: Properties of BSCCO tape used for D-shaped magnet. 87
Table 3.4: Double pancake D-shaped magnet parameters. 91
Table 3.5: Technical specification of Hall probe. 95
Table 3.6: Parameters of signal conditioning card for Hall probe 96
Table 3.7: Parameters of signal conditioning card for temperature sensor. 98
