ACKNOWLEDGEMENT

Since the very inception of the idea to effectuate this thesis, there has been available to excellent advisor, a magnanimous guidance and me a towering support from an indefatigable personality Dr. Ram Chandra, Scientist EII, IITRC, Lucknow and Dr. Vibhuti Rai, Prof. and Head, School of life Sciences, Pandit Ravi Shankar Shukla University, Raipur. I want to thank his for the pains he took to decipher my ideas through her sagacious guidance and encouraging me to complete this thesis by the benefit of his experiences throughout the progress of this arduous work.

I pay my wholehearted indebtedness to Dr. C. M. Gupta (Director, IITRC). I am grateful to him for his kind encouragement and blessings, and also for kindly providing necessary laboratory facilities.

I would like to acknowledge the UPSCST (Uttar Pradesh Council of Science and Technology) for funding this research programme.

I am gratefully obliged to Dr. D. K. Patel (Scientist-C, Analytical Chemistry Section) for HPLC, Dr. M. M. K. Reddy (Scientist-C, Analytical Chemistry Section) for GC-MS and Dr. Jai Raj Behari (Scientist-F, Head, Analytical Chemistry Section) of IITRC for kindly providing necessary facilities and for consistent and uncomprosing help in the analytical part of my work for phenol and pentachlorophenol biodegradation.

The support and advice of Dr. R. C. Murthy during this study was invaluable and very much appreciated for analysis of heavy metals. I would also like to thank Dr. A. K. Saxena (Gheru-in-charge, IITRC) for providing collaborative information and guidance.

It is with great pleasure that I offer my sincere gratitude to Dr. R. K. Jain (Scientist F) IMTECH, Chandigarh and Anuradha Ghosh (PhD Scholar) IMTECH, Chandigarh for the molecular characterization of bacterial strains, their blessing and constant inspiration throughout the course of this work.
I would like to extend my acknowledge with heartfelt thanks to all those senior
and colleagues Dr. Praveen Kumar, Mrs. Sonal Chaturvedi, Mr. Abhay Raj, Mr. Beer
Bahadur Singh, Mr. Ram Naresh Bharagava and Ms. Sangeeta Yadav who stood by
me and helped me a lot in innumerable co-operative ways. I would like to thanks to
technical staff of Environmental Microbiology Section, ITRC to Mr. Dheer Kumar,
Mr. Ramkumar and Mr. Umakant who helped me a lot in innumerable co-operative
ways and library staff of ITRC who for kindly providing necessary support and
facilities throughout the course of this thesis work.

I am gratefully obliged to Dr. Hansraj Singh, Mahendra Raj Singh, Sushil
Singh and Dr. Neeraj Singh for their constant help and moral support to me.

I am also obliged to Dr. S. N. Sanklewara (Associate Professor, KGMC) for
helping during completion of my thesis work.

Words fail to express my feelings for my parents and my family members for
their blessings, patience, inspiration and constant support, which enabled me to
complete my thesis work. I would like to thank them for their moral encouragement,
which sustained me at times required.

Shail Singh
