ACKNOWLEDGEMENTS

Any thesis is the culmination of any course of study for Doctoral Degree, as such it forms the crown piece. This crown piece of my Ph.D. (Biotechnology) degree has taken its shape due to the assiduous efforts of my research supervisor Dr. Mitashree Mitra, Professor, School of Studies in Anthropology, Pt. Ravishankar Shukla University, Raipur (C.G.), for her patience, guidance, and faithful criticism. Scholarly and up to the mark recommendations proved to be flambeau showing me right way towards my destination. It was really generous of her to steal time for this task in the midst of her busy schedule. I convey my thankfulness to her for her fervency and inspiration, which imbued me with the unparalleled zeal throughout the whole investigation.

I am deeply obliged to Professor S.K. Mishra, my co-supervisor, School of Studies in Life Sciences, Pt. Ravishankar Shukla University, Raipur (C.G.) for his excellent suggestions and fruitful criticism, which always provided me solace during the tenure of investigation.

Words can't utter my profound sense of gratitude and my sincere thanks to Prof. P.P. Majumder, Head, Human Genetics Unit, Indian Statistical Institute, Kolkata (W.B) and the members of the laboratory of the Human Genetics Unit of Indian Statistical Institute, Kolkata, for their painstaking efforts, useful suggestions and fruitful criticism, which always provide me solace during the tenure of this investigation.

I take this opportunity to express my gratitude to Dr. (Mrs.) Manjula Guha, Head, School of Studies in Anthropology and Prof. V. Rai, Head, School of Studies Life Sciences, Pt. Ravishankar Shukla University, Raipur (C.G.) for their constant encouragement and wholehearted support during the course of this study and for providing me necessary lab facilities during the period of my investigation.

Submission of thesis is supposed to be an individual task, but de facto it is a collective work of many hands and many minds. I am indebted to this team of Prof M.L. Naik, Dr. Moyna Chakraborty, Dr. Arun Kumar, Dr. A.K. Pradhan, Dr. A.K. Pati, Dr. (Mrs.) Vijaya Koche, Dr. A.K. Gupta, Dr. (Mrs.) A. Poddar, who have taught me to be thankful and to unhesitatingly express my gratitude.

I am grateful to the Department of Biotechnology, Ministry of Science & Technology Government of India, for financial support for this study.

I am having nostalgic feeling for my bosom friend, Ms. Sukrita Kujur who always gave wings to my ideas and made me fly to high. I cannot find appropriate words to express my heartfelt thankfulness to my dearest friends Arti Brokar, Barkha Sharma, Dinesh Mishra for
giving me helping hand and bequeathed upon me their overwhelming affection and warmth appreciation.

My special thanks are due to Dr. Arvind Sharma, Dr. Narayan Sahu and all other friends and staff of our department for helping me and giving good company during my study.

I would also like to convey my cordial thanks to Mr. Pankaj Saxena for excellent typing and formatting of this manuscript in time.

After completing my work, in future, whenever I'll open my thesis, each page of this manuscript will tell story of contribution of my colleagues as well wishes. It will be untold story and never be expressed in words..

At last, I am quite at sea, as I can't express my feeling for my parents Father Shri V.K.S. Rathore, Father-in-law Dr. B.S. Thakur, Mother Smt. Nirmala Rathore, Mother-in-law Smt. Minakshi Thakur and dear most brother Mohit Rathore whose affection, encouragement, sacrifices and blessing have always been the most vital source of inspiration during the entire crucial period of study. Thanks are due to my husband Dr. Kapil Singh Thakur for his continuous encouragement, support, love, advice, and faith on me to set higher. My special and heartiest thanks goes to the cutest baby of the world, my newborn baby Kanha through Master's grace.

Lastly with Grace of God (Mastar), The Almighty helped me through all of my endeavors.

Raipur
