Acknowledgements

Almost all real systems are nonlinear. For a nonlinear system the superposition principle breaks down; the system's response is not proportional to the stimulus it receives; the whole is more than the sum of its parts!

I was introduced to the exciting world of nonlinear physics by Prof. V.C. Kuriakose whose extensive knowledge and expertise in the field guided me to carry out this research work in the Department of Physics, Cochin University of Science and Technology. It’s my pleasure to express enormous gratitude and record deepest sense of appreciation to him for his deep involvement, continuous encouragement and also for the very meaningful and stimulating discussions. His keen insight and creative ideas provided the platform and precise guidelines for my efforts to understand the complexities of nonlinear optics.

I am extremely grateful to Prof. T. Ramesh Babu, Head of the Department of Physics, Cochin University of Science and Technology for the fruitful and encouraging discussions and also for providing me the necessary facilities to accomplish this research. I remain deeply indebted to Prof. M. Sabir, Department
of Physics for the excellent motivation and support rendered to me throughout the course of this work.

I really enjoyed the company of my co-researchers in the theoretical division, C.P. Jisha, Chithra R. Nayak, R. Radhakrishnan, R. Sini, O.K Vinayaraj, M.Vivck, Nijo, Prajitha, Priyesh and all other research scholars who sustained me with encouragement and assisted me a lot during the course of this work. My special thanks also go to all the faculty members, non-teaching staff of the department who have extended a helping hand for the fulfillment of my task.

I express my deep sense of gratitude to Prof. K. Porsezian and Mr. M.C. Padmarajan for their inspiring and valuable suggestions through discussions on the topic. I wish to acknowledge Mr.V.Kabeer and Mr.Satheesh for helping me in the numerical simulations.

Farook College, Kozhikode ever remains in the forefront for academic enrichment of its faculty in the field of research. The Management of the College, Prof.A. Kut tidalikutty. Principal and Dr.P.M. Mubarak Pasha, former Principal deserve special mention for granting permission to undergo the course on Faculty Improvement Programme. I would also like to thank my colleagues in the Department of Physics for their keen interest and encouragement in my research work.

My special thanks are also recorded hereby to the University Grants Commission, New Delhi and also to the Government of Kerala for granting teacher fellowship and sanctioning deputation without which this work would have been impossible.
And of course, the progress of a task undertaken is greatly influenced by the love and support one enjoys in the company one belongs to. Let me take this opportunity to express my gratitude and appreciation to all my friends and relatives who supported and encouraged me in various ways during the course of this work.

P.A. Subha
